

PART 70 OPERATING PERMIT

INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT
OFFICE OF AIR QUALITY

and

HAMMOND DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

Silgan Containers Manufacturing Corporation
2501 – 165th Street
Hammond, Indiana 46320

(herein known as the Permittee) is hereby authorized to operate subject to the conditions contained herein, the source described in Section A (Source Summary) of this permit.

This permit is issued in accordance with 326 IAC 2 and 40 CFR Part 70 Appendix A and contains the conditions and provisions specified in 326 IAC 2-7 as required by 42 U.S.C. 7401, et. seq. (Clean Air Act as amended by the 1990 Clean Air Act Amendments), 40 CFR Part 70.6, IC 13-15 and IC 13-17.

Operation Permit No.: T089-6900-00202	
Issued by: _____ Janet G. McCabe, Assistant Commissioner Office of Air Quality	Issuance Date: _____
Issued by: _____ Ronald L. Novak, Director Hammond Department of Environmental Management	Expiration Date: _____

TABLE OF CONTENTS

A	SOURCE SUMMARY	5
A.1	General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

SECTION A

SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management-Office of Air Quality (IDEM-OAQ) and the Hammond Department of Environmental Management (HDEM). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)] [326 IAC 2-7-1(22)]

The Permittee owns and operates a stationary, metal coil coating for can manufacturers operation, that coats steel and aluminum coils.

Responsible Official: Roger Mentz, Plant Manager
Source Address: 2501 – 165th Street, Hammond, Indiana 46320
Mailing Address: (same)
SIC Code: 3479 & 3411 - Metal Coil Coating for Can Manufacturers,
Coated Steel and Aluminum Coils

County Location: Lake
Source Location Status: Attainment/Unclassifiable for CO, NO₂ and Lead,
Primary Nonattainment for SO₂,
Moderate Nonattainment for PM₁₀, and
Severe Nonattainment for Ozone.

Source Status: Part 70 Permit Program
Major Source, under Emission Offset Rules;
Major Source, Section 112 of the Clean Air Act
Not 1 of 28 source categories listed under 326 IAC 2-2

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

- (a) One (1) Coil Coating Line, identified as Oven and Oxidizer 1, constructed in 1957, with a maximum line speed of 600 ft/min and maximum heat input rate of 44 MMBtu/hr and 20 MMBtu/hr, respectively (total combined capacity 64 MMBtu/hr), natural gas-fired only. The application method is roll coating. The VOC emissions from this line are controlled by one (1) fume incinerator which exhausts to stacks, identified as OX 1 and OX 3. This line also includes ten (10) mixing tanks, identified as MT 1 – MT 10, constructed in 1984, each with a maximum capacity of 290 gallons.
- (b) Three (3) Rapid Engineering Spaceheaters, identified as AMU 1, AMU 2, and AMU 3, constructed in 1996, each rated at 9.65 MMBtu/hr and natural gas-fired only.
- (c) Seven (7) Indoor Vertical, Fixed-Roof Storage Tanks, identified as Tanks 1 – 7, Tanks 1 – 5 each with a maximum capacity of 12,000 gallons, constructed in 1970, and Tanks 6 & 7 each with a maximum capacity of 10,000 gallons, constructed in 1995, venting to TV 1 – TV 7. These seven tanks are used to store various solvents and coatings.
- (d) Two (2) Dock Heaters No. 1 and No. 2, identified as Dock 1 and Dock 2, constructed in 1969, each rated at 0.75 MMBtu/hr and natural gas-fired only.

A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)]
[326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):

- (1) Space heaters, process heaters, or boilers using the following fuels.
 - (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour.
- (2) Equipment powered by internal combustion engines of capacity equal to or less than 500,000 Btu/hour, except where total capacity of equipment operated by one stationary source exceeds 2,000,000 Btu/hour.
- (3) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment.
- (4) Paved and unpaved roads and parking lots with public access.
- (5) Purging of gas lines and vessels that is related to routine maintenance and repair of buildings, structures, or vehicles at the source where air emissions from those activities would not be associated with any production process.
- (6) Emergency generators as follows:
Diesel generators not exceeding 1600 horsepower.
- (7) Grinding and machining operations combined with fabric filters, scrubbers, mist collectors, wet collectors and electrostatic precipitators with a design grain loading of less than or equal to 0.03 grains per actual cubic foot and a gas flow rate less than or equal to 4000 actual cubic feet per minute, including the following: deburring; buffing; polishing; abrasive blasting; pneumatic conveying; and woodworking operations.
- (8) A laboratory as defined in 326 IAC 2-7-1(21)(D).
- (9) Other categories with emissions below insignificant thresholds not specifically regulated:
 - (a) One (1) Roll Grinder emitting less than one (1) lb/day of particulate.
 - (b) One (1) Emergency Diesel Generator emitting less than 1 lb/day of products of combustion.
 - (c) One (1) Gasoline Generator/Welder emitting less than 1 lb/day of products of combustion.
 - (d) One (1) Roll Lathe with Dust Collector emitting less than 1 lb/day of particulate.
 - (e) One (1) Radial Arm Saw with Cyclone and Bag Filter emitting less than 1 lb/day of particulate.
 - (f) Two (2) 50 Gallon Closed Top Degreasers emitting less than 1 lb/day of volatile organic compounds.

A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) It is a major source, as defined in 326 IAC 2-7-1(22);
- (b) It is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 - Applicability).

SECTION B

GENERAL CONDITIONS

B.1 Definitions [326 IAC 2-7-1]

Terms in this permit shall have the definition assigned to such terms in the referenced regulation. In the absence of definitions in the referenced regulation, the applicable definitions found in the statutes or regulations (IC 13-11, 326 IAC 1-2 and 326 IAC 2-7) shall prevail.

B.2 Permit Term [326 IAC 2-7-5(2)]

This permit is issued for a fixed term of five (5) years from the original date, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date.

B.3 Enforceability [326 IAC 2-7-7]

- (a) Unless otherwise stated, all terms and conditions in this permit, including any provisions designed to limit the source's potential to emit, are enforceable by IDEM, HDEM, the United States Environmental Protection Agency (U.S. EPA) and by citizens in accordance with the Clean Air Act.
- (b) Unless otherwise stated, all terms and conditions in this permit that are local requirements, including any provisions designed to limit the source's potential to emit, are enforceable by HDEM.

B.4 Termination of Right to Operate [326 IAC 2-7-10] [326 IAC 2-7-4(a)]

The Permittee's right to operate this source terminates with the expiration of this permit unless a timely and complete renewal application is submitted at least nine (9) months prior to the date of expiration of the source's existing permit, consistent with 326 IAC 2-7-3 and 326 IAC 2-7-4(a).

B.5 Severability [326 IAC 2-7-5(5)]

The provisions of this permit are severable; a determination that any portion of this permit is invalid shall not affect the validity of the remainder of the permit.

B.6 Property Rights or Exclusive Privilege [326 IAC 2-7-5(6)(D)]

This permit does not convey any property rights of any sort, or any exclusive privilege.

B.7 Duty to Supplement and Provide Information [326 IAC 2-7-4(b)] [326 IAC 2-7-5(6)(E)] [326 IAC 2-7-6(6)]

- (a) The Permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The submittal by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall furnish to IDEM-OAQ and HDEM, within a reasonable time, any information that IDEM-OAQ and HDEM may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34). Upon request, the Permittee shall also furnish to IDEM-OAQ and HDEM copies of records required to be kept by this permit or, for information claimed to be confidential, the Permittee may furnish such records directly to the U. S. EPA along with a claim of confidentiality. [326 IAC 2-7-5(6)(E)]
- (c) The Permittee may include a claim of confidentiality in accordance with 326 IAC 17. When furnishing copies of requested records directly to U. S. EPA, the Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

B.8 Compliance with Permit Conditions [326 IAC 2-7-5(6)(A)] [326 IAC 2-7-5(6)(B)]

- (a) The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit, except those specifically designated as not federally enforceable, constitutes a violation of the Clean Air Act and is grounds for:
 - (1) Enforcement action;
 - (2) Permit termination, revocation and reissuance, or modification; or
 - (3) Denial of a permit renewal application.
- (b) It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
- (c) An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in condition B, Emergency Provisions.

B.9 Certification [326 IAC 2-7-4(f)] [326 IAC 2-7-6(1)] [326 IAC 2-7-5(3)C]

- (a) Where specifically designated by this permit or required by an applicable requirement, any application form, report, or compliance certification submitted shall contain certification by a responsible official of truth, accuracy, and completeness. This certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.
- (b) One (1) certification shall be included, using the attached Certification Form, with each submittal requiring certification.
- (c) A responsible official is defined at 326 IAC 2-7-1(34).

B.10 Annual Compliance Certification [326 IAC 2-7-6(5)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source’s compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. The initial certification shall cover the time period from the date of final permit issuance through December 31 of the same year. All subsequent certifications shall cover the time period

from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than **April 15th** of each year to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Air Enforcement Branch - Indiana (AE-17J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

- (b) The annual compliance certification report required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM-OAQ and HDEM on or before the date it is due.
- (c) The annual compliance certification report shall include the following:
 - (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
 - (2) The compliance status;
 - (3) Whether compliance was continuous or intermittent;
 - (4) The methods used for determining compliance status of the source, currently and over the reporting period consistent with 326 IAC 2-7-5(3); and
 - (5) Such other facts, as specified in Sections D of this permit, as IDEM-OAQ and HDEM may require to determine the compliance status of the source.

The submittal by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

B.11 Preventive Maintenance Plan [326 IAC 2-7-5(1),(3) and (13)] [326 IAC 2-7-6(1) and (6)]
[326 IAC 1-6-3]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall prepare and maintain Preventive Maintenance Plans (PMPs) within **ninety (90) days** after issuance of this permit, including the following information on each facility:
 - (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and

- (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If, due to circumstances beyond the Permittee's control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The PMP and the PMP extension notification do not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall implement the PMPs as necessary to ensure that failure to implement a PMP does not cause or contribute to a violation of any limitation on emissions or potential to emit.
- (c) A copy of the PMP's shall be submitted to IDEM-OAQ and HDEM upon request and within a reasonable time, and shall be subject to review and approval by IDEM-OAQ and HDEM. IDEM-OAQ and HDEM may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or contributes to any violation. The PMP does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (d) Records of preventive maintenance shall be retained for a period of at least five (5) years. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner or HDEM makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner or HDEM within a reasonable time.

B.12 Emergency Provisions [326 IAC 2-7-16]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation, except as provided in 326 IAC 2-7-16.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly signed, contemporaneous operating logs or other relevant evidence that describe the following:
- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
- (2) The permitted facility was at the time being properly operated;

- (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
- (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM-OAQ and HDEM within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-7-5(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;
- (B) Any steps taken to mitigate the emissions; and
- (C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (6) The Permittee immediately took all reasonable steps to correct the emergency.
- (c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.

- (d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions). This permit condition is in addition to any emergency or upset provision contained in any applicable requirement.
- (e) IDEM-OAQ and HDEM may require that the Preventive Maintenance Plans required under 326 IAC 2-7-4-(c)(10) be revised in response to an emergency.
- (f) Failure to notify IDEM-OAQ and HDEM by telephone or facsimile of an emergency lasting more than one (1) hour in accordance with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-7 and any other applicable rules.
- (g) Operations may continue during an emergency only if the following conditions are met:
 - (1) If the emergency situation causes a deviation from a technology-based limit, the Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.
 - (2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:
 - (A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and
 - (B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw materials of substantial economic value.

Any operation shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.

B.13 Permit Shield [326 IAC 2-7-15] [326 IAC 2-7-20] [326 IAC 2-7-12]

- (a) Pursuant to 326 IAC 2-7-15, the Permittee has been granted a permit shield. The permit shield provides that compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that either the applicable requirements are included and specifically identified in this permit or the permit contains an explicit determination or concise summary of a determination that other specifically identified requirements are not applicable. The Indiana statutes from IC 13 and rules from 326 IAC, referenced in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7 or for applicable requirements for which a permit shield has been granted.

This permit shield does not extend to applicable requirements which are promulgated after the date of issuance of this permit unless this permit has been modified to reflect such new requirements.

- (b) This permit shall be used as the primary document for determining compliance with applicable requirements established by previously issued permits. All previously issued operating permits are superseded by this permit.
- (c) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance,

IDEM-OAQ or HDEM shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued. The permit shield shall continue in effect so long as the Permittee is in compliance with the compliance order.

- (d) No permit shield shall apply to any permit term or condition that is determined after issuance of this permit to have been based on erroneous information supplied in the permit application. Erroneous information means information that the Permittee knew to be false, or in the exercise of reasonable care should have been known to be false, at the time the information was submitted.
- (e) Nothing in 326 IAC 2-7-15 or in this permit shall alter or affect the following:
 - (1) The provisions of Section 303 of the Clean Air Act (emergency orders), including the authority of the U.S. EPA under Section 303 of the Clean Air Act;
 - (2) The liability of the Permittee for any violation of applicable requirements prior to or at the time of this permit's issuance;
 - (3) The applicable requirements of the acid rain program, consistent with Section 408(a) of the Clean Air Act; and
 - (4) The ability of U.S. EPA to obtain information from the Permittee under Section 114 of the Clean Air Act.
- (f) This permit shield is not applicable to any change made under 326 IAC 2-7-20(b)(2) (Sections 502(b)(10) of the Clean Air Act changes) and 326 IAC 2-7-20(c)(2) (trading based on State Implementation Plan (SIP) provisions).
- (g) This permit shield is not applicable to modifications eligible for group processing until after IDEM-OAQ or HDEM has issued the modifications. [326 IAC 2-7-12(c)(7)]
- (h) This permit shield is not applicable to minor Part 70 permit modifications until after IDEM-OAQ or HDEM has issued the modification. [326 IAC 2-7-12(b)(7)]

B.14 Multiple Exceedances [326 IAC 2-7-5(1)(E)]

Any exceedance of a permit limitation or condition contained in this permit, which occurs contemporaneously with an exceedance of an associated surrogate or operating parameter established to detect or assure compliance with that limit or condition, both arising out of the same act or occurrence, shall constitute a single potential violation of this permit.

B.15 Deviations from Permit Requirements and Conditions [326 IAC 2-7-5(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. Deviations that are required to be reported by an applicable requirement shall be reported according to the schedule stated in the applicable requirement and do not need to be included in this report.

The notification by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit or a rule. It does not include:
 - (1) An excursion from compliance monitoring parameters as identified in Section D of this permit unless tied to an applicable rule or limit; or
 - (2) Failure to implement elements of the Preventive Maintenance Plan unless such failure has caused or contributed to a deviation.

A Permittee's failure to take the appropriate response step when an excursion of a compliance monitoring parameter has occurred is a deviation.

- (c) Emergencies shall be included in the Quarterly Deviation and Compliance Monitoring Report.

B.16 Permit Modification, Reopening, Revocation and Reissuance, or Termination
[326 IAC 2-7-5(6)(C)] [326 IAC 2-7-8(a)] [326 IAC 2-7-9]

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a Part 70 permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-7-5(6)(C)] The notification by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM-OAQ or HDEM determines any of the following:
 - (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
 - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-7-9(a)(3)]
- (c) Proceedings by IDEM-OAQ or HDEM to reopen and revise this permit shall follow the same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-7-9(b)]
- (d) The reopening and revision of this permit, under 326 IAC 2-7-9(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM-OAQ or HDEM at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM-

OAQ or HDEM may provide a shorter time period in the case of an emergency. [326 IAC 2-7-9(c)]

B.17 Permit Renewal [326 IAC 2-7-4]

- (a) The application for renewal shall be submitted using the application form or forms prescribed by IDEM-OAQ and HDEM and shall include the information specified in 326 IAC 2-7-4. Such information shall be included in the application for each emission unit at this source, except those emission units included on the trivial or insignificant activities list contained in 326 IAC 2-7-1(21) and 326 IAC 2-7-1(40). The renewal application does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

Request for renewal shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

- (b) **Timely Submittal of Permit Renewal** [326 IAC 2-7-4(a)(1)(D)]

- (1) A timely renewal application is one that is:

- (A) Submitted at least nine (9) months prior to the date of the expiration of this permit; and
- (B) If the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM-OAQ and HDEM on or before the date it is due.

- (2) If IDEM-OAQ or HDEM, upon receiving a timely and complete permit application, fails to issue or deny the permit renewal prior to the expiration date of this permit, this existing permit shall not expire and all terms and conditions shall continue in effect, including any permit shield provided in 326 IAC 2-7-15, until the renewal permit has been issued or denied.

- (c) **Right to Operate After Application for Renewal** [326 IAC 2-7-3]
If the Permittee submits a timely and complete application for renewal of this permit, the source's failure to have a permit is not a violation of 326 IAC 2-7 until IDEM-OAQ and HDEM takes final action on the renewal application, except that this protection shall cease to apply if, subsequent to the completeness determination, the Permittee fails to submit by the deadline specified in writing by IDEM-OAQ and HDEM, any additional information identified as being needed to process the application.
- (d) **United States Environmental Protection Agency Authority** [326 IAC 2-7-8(e)]
If IDEM-OAQ and HDEM fail to act in a timely way on a Part 70 permit renewal, the U.S. EPA may invoke its authority under Section 505(e) of the Clean Air Act to terminate or revoke and reissue a Part 70 permit.

B.18 Permit Amendment or Modification [326 IAC 2-7-11] [326 IAC 2-7-12]

- (a) Permit amendments and modifications are governed by the requirements of 326 IAC 2-7-11 or 326 IAC 2-7-12 whenever the Permittee seeks to amend or modify this permit.

- (b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

Any such application should be certified by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

B.19 Permit Revision Under Economic Incentives and Other Programs [326 IAC 2-7-5(8)] [326 IAC 2-7-12 (b)(2)]

- (a) No Part 70 permit revision shall be required under any approved economic incentives, marketable Part 70 permits, emissions trading, and other similar programs or processes for changes that are provided for in a Part 70 permit.
- (b) Notwithstanding 326 IAC 2-7-12(b)(1)(D)(i) and 326 IAC 2-7-12(c)(1), minor Part 70 permit modification procedures may be used for Part 70 modifications involving the use of economic incentives, marketable Part 70 permits, emissions trading, and other similar approaches to the extent that such minor Part 70 permit modification procedures are explicitly provided for in the applicable State Implementation Plan (SIP) or in applicable requirements promulgated or approved by the U.S. EPA.

B.20 Operational Flexibility [326 IAC 2-7-20] [326 IAC 2-7-10.5]

- (a) The Permittee may make any change or changes at the source that are described in 326 IAC 2-7-20(b), (c), or (e), without a prior permit revision, if each of the following conditions is met:
- (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
 - (2) Any preconstruction approval required by 326 IAC 2-7-10.5 has been obtained;
 - (3) The changes do not result in emissions which exceed the emissions allowable under this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
 - (4) The Permittee notifies the:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

- (5) The Permittee maintains records on-site which document, on a rolling five (5) year basis, all such changes and emissions trading that are subject to 326 IAC 2-7-20(b), (c), or (e) and makes such records available, upon reasonable request, for public review.

Such records shall consist of all information required to be submitted to IDEM-OAQ and HDEM in the notices specified in 326 IAC 2-7-20(b), (c)(1), and (e)(2).

- (b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-7-20(a). For each such Section 502(b)(10) of the Clean Air Act change, the required written notification shall include the following:

- (1) A brief description of the change within the source;
- (2) The date on which the change will occur;
- (3) Any change in emissions; and
- (4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) Emission Trades [326 IAC 2-7-20(c)]
The Permittee may trade increases and decreases in emissions in the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-7-20(c).
- (d) Alternative Operating Scenarios [326 IAC 2-7-20(d)]
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-7-5(9). No prior notification of IDEM-OAQ, HDEM, or U.S. EPA is required.

B.21 Source Modification Requirement [326 IAC 2-7-10.5]

A modification, construction, or reconstruction is governed by 326 IAC 2 and 326 IAC 2-7-10.5.

B.22 Inspection and Entry [326 IAC 2-7-6] [IC 13-14-2-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM-OAQ, HDEM, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a Part 70 source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
- (b) Have access to and copy, any records that must be kept under the conditions of this permit;
- (c) Inspect, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
- (d) Sample or monitor, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
- (e) Utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.

B.23 Transfer of Ownership or Operational Control [326 IAC 2-7-11]

- (a) The Permittee must comply with the requirements of 326 IAC 2-7-11 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The application which shall be submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

B.24 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-7-5(7)]

- (a) The Permittee shall pay annual fees to IDEM-OAQ and HDEM within thirty (30) calendar days of receipt of a billing. Pursuant to 326 IAC 2-7-19(b), if the Permittee does not receive a bill from IDEM-OAQ and HDEM the applicable fee is due April 1 of each year.
- (b) Except as provided in 326 IAC 2-7-19(e), failure to pay may result in administrative enforcement action or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-0425 (ask for OAQ, Technical Support and Modeling Section), to determine the appropriate permit fee.

B.25 Advanced Source Modification Approval [326 IAC 2-7-5(16)] [326 IAC 2-7-10.5]

- (a) The requirements to obtain a source modification approval under 326 IAC 2-7-10.5 or a permit modification under 326 IAC 2-7-12 are satisfied by this permit for the proposed emission units, control equipment or insignificant activities in Sections A.2 and A.3.
- (b) Pursuant to 326 IAC 2-1.1-9 any permit authorizing construction may be revoked if construction of the emission unit has not commenced within eighteen (18) months from the date of issuance of the permit, or if during the construction work is suspended for a continuous period of one (1) year or more.

SECTION C

SOURCE OPERATION CONDITIONS

Entire Source

Emission Limitations and Standards [326 IAC 2-7-5(1)]

C.1 Particulate Matter Emission Limitations For Processes with Process Weight Rates Less Than One Hundred (100) pounds per hour [326 IAC 6-3-2(c)]

Pursuant to 326 IAC 6-3-2(c), the allowable particulate matter emissions rate from any process not already regulated by 326 IAC 6-1 or any New Source Performance Standard, and which has a maximum process weight rate less than 100 pounds per hour shall not exceed 0.551 pounds per hour.

C.2 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of twenty percent (20%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

C.3 Open Burning [326 IAC 4-1] [IC 13-17-9]

The Permittee shall not open burn any material except as provided in 326 IAC 4-1-3, 326 IAC 4-1-4 or 326 IAC 4-1-6. The previous sentence notwithstanding, the Permittee may open burn in accordance with an open burning approval issued by the Commissioner under 326 IAC 4-1-4.1. 326 IAC 4-1-3 (a)(2)(A) and (B) are not federally enforceable.

C.4 Incineration [326 IAC 4-2][326 IAC 9-1-2]

The Permittee shall not operate an incinerator or incinerate any waste or refuse except as provided in 326 IAC 4-2 and 326 IAC 9-1-2. 326 IAC 9-1-2 is not federally enforceable.

C.5 Fugitive Dust Emissions [326 IAC 6-4]

The Permittee shall not allow fugitive dust to escape beyond the property line or boundaries of the property, right-of-way, or easement on which the source is located, in a manner that would violate 326 IAC 6-4 (Fugitive Dust Emissions). 326 IAC 6-4-2(4) is not federally enforceable.

C.6 Operation of Equipment [326 IAC 2-7-6(6)]

Except as otherwise provided by statute, rule, or in this permit, all air pollution control equipment listed in this permit and used to comply with an applicable requirement shall be operated at all times that the emission unit(s) vented to the control equipment are in operation.

C.7 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25)

tons per year or more of particulate matter or sulfur dioxide is emitted. The provisions of 326 IAC 1-7-2, 326 IAC 1-7-3(c) and (d), 326 IAC 1-7-4(d)(3), (e), and (f), and 326 IAC 1-7-5(d) are not federally enforceable.

C.8 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] [40 CFR 61, Subpart M]

- (a) Notification requirements apply to each owner or operator. If the combined amount of regulated asbestos containing material (RACM) to be stripped, removed or disturbed is at least 260 linear feet on pipes or 160 square feet on other facility components, or at least thirty-five (35) cubic feet on all facility components, then the notification requirements of 326 IAC 14-10-3 are mandatory. All demolition projects require notification whether or not asbestos is present.
- (b) The Permittee shall ensure that a written notification is sent on a form provided by the Commissioner at least ten (10) working days before asbestos stripping or removal work or before demolition begins, per 326 IAC 14-10-3, and shall update such notice as necessary, including, but not limited to the following:
 - (1) When the amount of affected asbestos containing material increases or decreases by at least twenty percent (20%); or
 - (2) If there is a change in the following:
 - (A) Asbestos removal or demolition start date;
 - (B) Removal or demolition contractor; or
 - (C) Waste disposal site.
- (c) The Permittee shall ensure that the notice is postmarked or delivered according to the guidelines set forth in 326 IAC 14-10-3(2).
- (d) The notice to be submitted shall include the information enumerated in 326 IAC 14-10-3(3).

All required notifications shall be submitted to:

Indiana Department of Environmental Management
Asbestos Section, Office of Air Quality
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The notifications do not require a certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (e) **Procedures for Asbestos Emission Control**
The Permittee shall comply with the emission control procedures in 326 IAC 14-10-4 and 40 CFR 61.145(c). Per 326 IAC 14-10-4, emission control requirements are applicable for any removal or disturbance of RACM greater than three (3) linear feet on pipes or three (3) square feet on any other facility components or a total of at least 0.75 cubic feet on all facility components.

- (f) Indiana Accredited Asbestos Inspector
The Permittee shall comply with 326 IAC 14-10-1(a) that requires the owner or operator, prior to a renovation/demolition, to use an Indiana Accredited Asbestos Inspector to thoroughly inspect the affected portion of the facility for the presence of asbestos. The requirement that the inspector be accredited is federally enforceable.

Testing Requirements [326 IAC 2-7-6(1)]

C.9 Performance Testing [326 IAC 3-6]

- (a) All testing shall be performed according to the provisions of 326 IAC 3-6 (Source Sampling Procedures), except as provided elsewhere in this permit, utilizing any applicable procedures and analysis methods specified in 40 CFR 51, 40 CFR 60, 40 CFR 61, 40 CFR 63, 40 CFR 75, or other procedures approved by IDEM-OAQ.

A test protocol, except as provided elsewhere in this permit, shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

no later than thirty-five (35) days prior to the intended test date. The protocol submitted by the Permittee does not require certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall notify IDEM-OAQ and HDEM of the actual test date at least fourteen (14) days prior to the actual test date. The notification submitted by the Permittee does not require certification by the “responsible official” as defined by 326 IAC 2-7-1(34).
- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM-OAQ and HDEM not later than forty-five (45) days after the completion of the testing. An extension may be granted by IDEM-OAQ and HDEM, if the source submits to IDEM-OAQ and HDEM, a reasonable written explanation not later than five (5) days prior to the end of the initial forty-five (45) day period.

Compliance Requirements [326 IAC 2-1.1-11]

C.10 Compliance Requirements [326 IAC 2-1.1-11]

The commissioner may require stack testing, monitoring, or reporting at any time to assure compliance with all applicable requirements. Any monitoring or testing shall be performed in accordance with 326 IAC 3 or other methods approved by the commissioner or the U.S. EPA.

Compliance Monitoring Requirements [326 IAC 2-7-5(1)] [326 IAC 2-7-6(1)]

C.11 Compliance Monitoring [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

Unless otherwise specified in this permit, all monitoring and record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance. If required by Section D, the Permittee shall be responsible for installing any necessary equipment

and initiating any required monitoring related to that equipment. If due to circumstances beyond its control, that equipment cannot be installed and operated within ninety (90) days, the Permittee may extend the compliance schedule related to the equipment for an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

in writing, prior to the end of the initial ninety (90) day compliance schedule, with full justification of the reasons for the inability to meet this date.

The notification which shall be submitted by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a source modification shall be implemented when operation begins.

C.12 Maintenance of Emission Monitoring Equipment [326 IAC 2-7-5(3)(A)(iii)]

- (a) In the event that a breakdown of the emission monitoring equipment occurs, a record shall be made of the times and reasons of the breakdown and efforts made to correct the problem. To the extent practicable, supplemental or intermittent monitoring of the parameter should be implemented at intervals no less frequent than required in Section D of this permit until such time as the monitoring equipment is back in operation. In the case of continuous monitoring, supplemental or intermittent monitoring of the parameter should be implemented at intervals no less than once an hour until such time as the continuous monitor is back in operation.
- (b) The Permittee shall install, calibrate, quality assure, maintain, and operate all necessary monitors and related equipment. In addition, prompt corrective action shall be initiated whenever indicated.

C.13 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, 40 CFR 60 Appendix B, 40 CFR 63, or other approved methods as specified in this permit.

C.14 Pressure Gauge and Other Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

- (a) Whenever a condition in this permit requires the measurement of pressure drop across any part of the unit or its control device, the gauge employed shall have a scale such that the expected normal reading shall be no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.
- (b) Whenever a condition in this permit requires the measurement of a temperature, the instrument employed shall have a scale such that the expected normal reading shall be

no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.

- (c) The Permittee may request the IDEM-OAQ approve the use of a pressure gauge or other instrument that does not meet the above specifications provided the Permittee can demonstrate an alternative pressure gauge or other instrument specification will adequately ensure compliance with permit conditions requiring the measurement of pressure drop or other parameters.

Corrective Actions and Response Steps [326 IAC 2-7-5] [326 IAC 2-7-6]

C.15 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee prepared and submitted written emergency reduction plans (ERPs) consistent with safe operating procedures on January 9, 2001.
- (b) If the ERP is disapproved by IDEM-OAQ or HDEM, the Permittee shall have an additional thirty (30) days to resolve the differences and submit an approvable ERP.
- (c) Upon direct notification by IDEM-OAQ or HDEM, that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level.
[326 IAC 1-5-3]

C.16 Risk Management Plan [326 IAC 2-7-5(12)] [40 CFR 68.215]

If a regulated substance, subject to 40 CFR 68, is present at a source in more than the threshold quantity, 40 CFR 68 is an applicable requirement and the Permittee shall submit:

- (a) A compliance schedule for meeting the requirements of 40 CFR 68; or
- (b) As a part of the annual compliance certification submitted under 326 IAC 2-7-6(5), a certification statement that the source is in compliance with all the requirements of 40 CFR 68, including the registration and submission of a Risk Management Plan (RMP); and
- (c) A verification to IDEM-OAQ and HDEM that a RMP or a revised plan was prepared and submitted as required by 40 CFR 68.

All documents submitted pursuant to this condition shall include the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

C.17 Compliance Monitoring Plan - Failure to Take Response Steps [326 IAC 2-7-5][326 IAC 2-7-6]

- (a) The Permittee is required to implement a compliance monitoring plan to ensure that reasonable information is available to evaluate its continuous compliance with applicable requirements. The compliance monitoring plan can be either an entirely new document, consist in whole of information contained in other documents, or consist of a combination of new information and information contained in other documents. If the compliance monitoring plan incorporates by reference information contained in other documents, the Permittee shall identify as part of the compliance monitoring plan the documents in which the information is found. The elements of the compliance monitoring plan are;
 - (1) This condition;

-
- (2) The Compliance Determination Requirements in Section D of this permit;
 - (3) The Compliance Monitoring Requirements in Section D of this permit;
 - (4) The Record Keeping and Reporting Requirements in Section C (Monitoring Data Availability, General Record Keeping Requirements, and General Reporting Requirements) and in Section D of this permit; and
 - (5) A Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. CRP's shall be submitted to IDEM-OAQ and HDEM upon request and shall be subject to review and approval by IDEM-OAQ and HDEM. The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee and maintained on site, and is comprised of:
 - (A) Reasonable response steps that may be implemented in the event that compliance related information indicates that a response step is needed pursuant to the requirements of Section D of this permit; and
 - (B) A time schedule for taking reasonable response steps including a schedule for devising additional response steps for situations that may not have been predicted.
- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition. Failure to take reasonable response steps shall constitute a violation of the permit.
- (c) Upon investigation of a compliance monitoring excursion, the Permittee is excused from taking further response steps for any of the following reasons:
- (1) A false reading occurs due to the malfunction of the monitoring equipment. This shall be an excuse from taking further response steps providing that prompt action was taken to correct the monitoring equipment.
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for an administrative amendment to the permit, and such request has not been denied.
 - (3) An automatic measurement was taken when the process was not operating.
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.
- (d) Records shall be kept of all instances in which the compliance related information was not met and of all response steps taken. In the event of an emergency, the provisions of 326 IAC 2-7-16 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- (e) All monitoring required in Section D shall be performed at all times the equipment is operating. If monitoring is required by Section D and the equipment is not operating, then the Permittee may record the fact that the equipment is not operating or perform the required monitoring.
- (f) At its discretion, IDEM may excuse the Permittee's failure to perform the monitoring and record keeping as required by Section D, if the Permittee provides adequate justification and documents that such failures do not exceed five percent (5%) of the operating time in any quarter. Temporary, unscheduled unavailability of qualified staff shall be considered

a valid reason for failure to perform the monitoring or record keeping requirements in Section D.

C.18 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-7-5] [326 IAC 2-7-6]

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate response actions. The Permittee shall submit a description of these response actions to IDEM-OAQ and HDEM within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the response actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM-OAQ and HDEM that retesting in one-hundred and twenty (120) days is not practicable, IDEM-OAQ and HDEM may extend the retesting deadline.
- (c) IDEM-OAQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition do not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

C.19 Emission Statement [326 IAC 2-7-5(3)(C)(iii)][326 IAC 2-7-5(7)][326 IAC 2-7-19(c)][326 IAC 2-6]

- (a) The Permittee shall submit an annual emission statement certified pursuant to the requirements of 326 IAC 2-6, that must be received by **April 15** of each year and must comply with the minimum requirements specified in 326 IAC 2-6-4. The annual emission statement shall meet the following requirements:
 - (1) Indicate estimated actual emissions of criteria pollutants from the source, in compliance with 326 IAC 2-6 (Emission Reporting);
 - (2) Indicate estimated actual emissions of other regulated pollutants (as defined by 326 IAC 2-7-1) from the source, for purposes of Part 70 fee assessment.
- (b) The annual emission statement covers the twelve (12) consecutive month time period starting December 1 and ending November 30. The annual emission statement must be submitted to:

Indiana Department of Environmental Management
Technical Support and Modeling Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The emission statement does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

- (c) The annual emission statement required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM-OAQ and HDEM on or before the date it is due.

C.20 General Record Keeping Requirements [326 IAC 2-7-5(3)][326 IAC 2-7-6]

- (a) Records of all required data, reports and support information shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner or HDEM makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner or HDEM within a reasonable time.
- (b) Unless otherwise specified in this permit, all record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

C.21 General Reporting Requirements [326 IAC 2-7-5(3)(C)] [326 IAC 2-1.1-11]

- (a) The source shall submit the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent. Any deviation from permit requirements, the date(s) of each deviation, the cause of the deviation, and the response steps taken must be reported. This report shall be submitted within thirty (30) days of the end of the reporting period. The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM-OAQ and HDEM on or before the date it is due.
- (d) Unless otherwise specified in this permit, any quarterly report required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. The report does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).
- (e) The first report shall cover the period commencing on the date of issuance of this permit and ending on the last day of the reporting period. Reporting periods are based on calendar years.

Stratospheric Ozone Protection

C.22 Compliance with 40 CFR 82 and 326 IAC 22-1

Pursuant to 40 CFR 82 (Protection of Stratospheric Ozone), Subpart F, except as provided for motor vehicle air conditioners in Subpart B, the Permittee shall comply with the standards for recycling and emissions reduction:

- (a) Persons opening appliances for maintenance, service, repair, or disposal must comply with the required practices pursuant to 40 CFR 82.156.
- (b) Equipment used during the maintenance, service, repair, or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 CFR 82.158.
- (c) Persons performing maintenance, service, repair, or disposal of appliances must be certified by an approved technician certification program pursuant to 40 CFR 82.161.

SECTION D.1

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)] One (1) Coil Coating Line, identified as Oven and Oxidizer 1, with a maximum line speed of 600 ft/min and maximum heat input rate of 44 MMBtu/hr and 20 MMBtu/hr, respectively (total combined capacity 64 MMBtu/hr), natural gas-fired only. The application method is roll coating. The VOC emissions from this line are controlled by one (1) fume incinerator which exhausts to stacks, identified as OX 1 and OX 3. This line also includes ten (10) mixing tanks, identified as MT 1 – MT 10, each with a maximum capacity of 290 gallons.
(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.1.1 Particulate Matter less than 10 microns (PM10) [326 IAC 6-1-10.1(d)]

Pursuant to 326 IAC 6-1-10.1 (Lake County PM10 emission requirements), the PM10 emissions from the Coil Coater shall be limited to 0.007 lbs/MMBtu and 0.290 lbs/hr as specifically listed in 326 IAC 6-1-10.1(d).

D.1.2 Particulate Matter less than 10 microns (PM10) [326 IAC 6-1-10.1(d)]

Pursuant to 326 IAC 6-1-10.1 (Lake County PM10 emission requirements), the PM10 emissions from the Stacks serving the incinerator shall be limited to 0.007 lbs/MMBtu and 0.310 lbs/hr as specifically listed in 326 IAC 6-1-10.1(d).

D.1.3 Sulfur Dioxide (SO2) emission limitations [326 IAC 7-4-1.1(b)(1)]

Pursuant to 326 IAC 7-4-1.1 (Lake County sulfur dioxide emission limitations), the SO2 emissions from the Coil Coating Oven and Incinerator shall be limited to 0.3 lbs/MMBtu as specifically listed in 326 IAC 7-4-1.1(b)(1).

D.1.4 Volatile Organic Compounds (VOCs) [326 IAC 8-2-4(b)] [326 IAC 8-1-2(b)] [326 IAC 8-7-3(3)]

Pursuant to 326 IAC 8-2-4(b) (Coil coating operations), the VOC emissions from the Coil Coating Line shall be limited to 2.6 pounds per gallon (excluding water) as specifically listed in 326 IAC 8-2-4(b).

Use of a non-compliant coating requires that compliance be determined according to RACT equivalency emission standards, expressed as pounds of VOC per gallon of coating solids, allowed under the applicable emission limitation contained in 326 IAC 8-1-2(b) (Compliance Methods). The equivalency emission limit is 4.02 pounds of VOC per gallon of coating solids as applied.

D.1.5 Specific VOC Reduction Requirements for Lake, Porter, Clark, and Floyd Counties [326 IAC 8-7]

Pursuant to 326 IAC 8-7-2 (Applicability), coating facilities which emit or have the potential to emit a total equal to or greater than ten (10) tons per year of VOCs in Lake County shall be subject to the requirements of 326 IAC 8-7 (Specific VOC Reduction Requirements for Lake, Porter, Clark, and Floyd Counties).

D.1.6 Preventive Maintenance Plan [326 IAC 2-7-5(13)]

A Preventive Maintenance Plan, in accordance with Section B – Preventive Maintenance Plan, of this permit, is required for this facility and its control device.

Compliance Determination Requirements

D.1.7 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11] [326 IAC 8-7-3(1)]

During the period between 30 and 36 months after issuance of this permit, the Permittee shall perform VOC testing utilizing methods as approved by the Commissioner. Testing shall also be performed at the inlet and outlet of the Incinerator 1 to demonstrate the control and destruction efficiencies necessary to achieve compliance with the RACT equivalency emission limit of 4.02 lbs of VOC/gallon of coating solids as applied. This test shall be repeated at least once every 5 years from the date of this valid compliance demonstration. Testing shall be conducted in accordance with Section C – Performance Testing.

D.1.8 Volatile Organic Compounds (VOCs) [326 IAC 8-1-2(b)] [326 IAC 8-7-3(3)]

Compliance with the VOC content and emission limitation contained in Condition D.1.4 shall be determined pursuant to 326 IAC 8-1-2(b) using formulation data supplied by the coating manufacturer.

Compliance with D.1.4 shall be determined using the following equations:

$$\text{Lbs/VOC per gal of solids} = (\text{lbs VOC per gal less water}) / (1 - \text{lbs VOC per gal less water} / \text{coating density (lbs/gal) as applied})$$

The emission limit in 326 IAC 8-2-4 is 2.6 lbs VOC per gal less water. The standard coating density used in formulas in the can industry is 7.36 lbs/gal as cited in 326 IAC 8-1-2. Therefore, the VOC limitation in terms of Lbs VOC/gal solids is:

$$\text{lbs/VOC per gal of solids} = 2.6 / (1 - 2.6/7.36) = 4.02 \text{ lbs VOC/ gal solids}$$

The emissions from the Coil Coater with Oven are controlled by one (1) fume incinerator. The overall rated control efficiency is 98%. This control efficiency is used to find the compliant limit of a coating's VOC content per gallon of coating solids.

(1-Overall Control Efficiency) X = emission limit of 4.02 lbs VOC per gal of solids (as applied)

where X = compliant coating limit in lbs VOC per gal of solids

$$(1 - 0.98) X = 4.02$$

$$X = 201 \text{ lbs VOC per gal of coating solids (as applied)}$$

$$\text{Coating Density (as applied)} = \text{Coating Density (as supplied)} + (\text{Dilution Solvent Density} \times \text{Dilution Ratio}) / (1 + \text{Dilution Ratio})$$

$$\text{lbs solids per gal of coating (as applied)} = \text{Coating Density (as supplied)} \times [\text{Weight \% Solids (as supplied)} / 100] / (1 + \text{Dilution Ratio})$$

$$\text{Weight \% Solids in coating (as applied)} = \text{lbs solids per gal coating} / \text{Coating Density (as applied)} \times 100$$

$$\text{Weight \% Solvent in coating (as applied)} = 100 - \text{Weight \% Solids (as applied)}$$

Volume % Solids in Coating (as applied) = Vol % Solids (as supplied) / (1 + Dilution Ratio)

lbs VOC/gal less water (as applied) = Density (as applied) X [Weight % Solvent (as applied) / 100]

lbs VOC/gal solids (as applied) = lbs VOC/gal less water (as applied) / [Volume % Solids (as applied) / 100]

The lbs VOC per gal of solids “as applied” is then compared to the limit for coil coating, considering the overall control efficiency, 201 lbs VOC per gal of coating solids (as applied). If lbs VOC per gal of solids “as applied” is less than this value, the coating “as applied” is compliant. If it is larger than this value, the coating “as applied” is not compliant and should not be used.

D.1.9 VOC Emissions

Compliance with Condition D1.4 shall be demonstrated within 30 days of the end of each quarter based on the daily weighted average of all coatings applied for the three (3) month reporting period.

D.1.10 Fume Incinerator [326 IAC 2-7-6] [326 IAC 8-7-3(1)]

Pursuant to 326 IAC 2-7-6, the fume incinerator used for VOC control shall operate at all times when the Coil Coating Line is in operation. When operating, the fume incinerator shall maintain a minimum operating temperature of 1,400°F or a temperature determined in the compliance test required by Condition D.1.7 to maintain a minimum 98% destruction of the volatile organic compound (VOC) captured.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.1.11 Parametric Monitoring

- (a) A continuous monitoring system shall be calibrated, maintained, and operated on the fume incinerator for measuring operating temperature. The output of this system shall be recorded, and that temperature shall be greater than or equal to the temperature used to demonstrate compliance during the most recent compliance stack test.
- (b) The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when the reading is outside the above mentioned range for any one reading. Failure to take response steps in accordance with Section C – Compliance Monitoring Plan – Failure to Take Response Steps, shall be considered a violation of this permit.

D.1.12 Visible Emissions Notations

- (a) Daily visible emission notations of the incinerator stack exhausts shall be performed during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.
- (b) For processes operated continuously, “normal” means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.
- (c) In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.

- (d) A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.
- (e) The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed. Failure to take response steps in accordance with Section C – Compliance Monitoring Plan – Failure to Take Response Steps, shall be considered a violation of this permit.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.1.13 Record Keeping Requirements

- (a) To document compliance with Condition D.1.4, the Permittee shall maintain records in accordance with (1) through (8) below. Records maintained for (1) through (8) shall be taken daily and shall be complete and sufficient to establish compliance with the VOC usage limit and/or the VOC emission limit established in Condition D.1.4.

Silgan Containers Manufacturing Corporation shall be required to document compliance with the applicable (VOC) emission limitation based on a daily weighted average of all coatings applied. These records shall include the following:

- (1) Date of use
- (2) Coating identification (inside and outside material)
- (3) Process operating rate (GALS/MLFT for each coating)
- (4) Coating usage (application rate in weight /area, total gallons of coating used, total gallons of solids used)
- (5) Coating information (as supplied and as applied of the coating density, % by weight & volume of organic volatiles, % by weight & volume of solids, lbs-VOC/gal less water as applied, lbs-VOC/gal of solids, dilution solvent used, and the dilution solvent ratio)
- (6) Control equipment efficiency
- (7) VOC emissions calculations (total lbs-VOC before controls and total lbs-VOC after controls)
- (8) VOC emissions allowable

Sample calculations must also be included for the above items.

- (b) To document compliance with Condition D.1.4, the Permittee shall be required to keep monthly records of all cleaning solvents used and the weight of any solvents reclaimed, manifested, and sent off-site for disposal and recovery.
- (c) To document compliance with Condition D.1.3, the Permittee shall be required to record and maintain the monthly fuel usage for the Coil Coating Line. These records shall be submitted upon request by either HDEM or IDEM.

- (d) That the Permittee be required to submit to the Department a formal request to use any new coatings not previously applied for prior to use. This request must be submitted at least seven (7) days in advance of use. The Permittee shall ensure compliance with 326 IAC 8-2-4 by performing those calculations listed in Condition D.1.8 and providing the Department with an MSDS.
- (e) That visible stack observations be made on a daily basis as either “normal” or “above normal”. Corrective actions must be taken upon observation of an “above normal” stack condition. The source shall be required to record this information in a log. This log shall be submitted upon request by HDEM or IDEM.
- (f) All records shall be maintained in accordance with Section C – General Record Keeping Requirements, of this permit.

D.1.14 Request for New Coatings

That the Permittee be required to submit to the Department a formal request to use any new coatings not previously applied for prior to use. This request must be submitted at least seven (7) days in advance of use. The Permittee shall ensure compliance with 326 IAC 8-2-4 by performing those calculations listed in Condition D.1.8 and providing the Department with an MSDS.

D.1.15 Reporting Requirements

A quarterly summary of the information to document compliance with Conditions D.1.4 and D.1.13 shall be submitted to the address(es) listed in Section C – General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

SECTION D.2

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)] Three (3) Rapid Engineering Spaceheaters, identified as AMU 1, AMU 2 and AMU 3, each rated at 9.65 MMBtu/hr. These units are natural gas-fired only.
(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.2.1 Particulate Matter (PM), Sulfur Dioxide (SO₂), Nitrogen Oxide (NO_x), Volatile Organic Compound (VOC), and Carbon Monoxide (CO)

That emissions from the combustion of natural gas are governed by the Hammond Air Quality Control Ordinance No. 3522 (as amended) for the following pollutants: Particulate Matter (PM), Sulfur Dioxide (SO₂), Nitrogen Oxide (NO_x), Volatile Organic Compounds (VOC), and Carbon Monoxide (CO).

Compliance Determination Requirements

D.2.2 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM or HDEM may require compliance testing at any specific time when necessary to determine if these facilities are in compliance. If testing is required by IDEM or HDEM, compliance with the limits specified in Condition D.2.1 shall be determined by a performance test conducted in accordance with Section C – Performance Testing.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.2.3 Compliance Monitoring

There are no compliance monitoring requirements applicable to these facilities.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.2.4 Record Keeping and Reporting Requirements

There are no record keeping and reporting requirements for these facilities.

SECTION D.3

FACILITY OPERATION CONDITIONS

Facility Description [326 IAC 2-7-5(15)] Seven (7) Indoor Vertical, Fixed-Roof Storage Tanks, identified as Tank 1 – 7, each with a maximum capacity of 12,000 gallons, venting to TV 1 – TV 7. These seven tanks are used to store various solvents and coatings.
(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.3.1 Volatile Organic Compound (VOC)

There are no emission limitations applicable to this facility.

Compliance Determination Requirements

D.3.2 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM or HDEM may require compliance testing at any specific time when necessary to determine if these facilities are in compliance. If testing is required by IDEM or HDEM, compliance with the limits specified in Condition D.3.1 shall be determined by a performance test conducted in accordance with Section C – Performance Testing.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.3.3 Compliance Monitoring

There are no compliance monitoring requirements applicable to these facilities.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.3.4 Record Keeping and Reporting Requirements

To document compliance with 326 IAC 8-9-6(a), the owner or operator of each vessel subject to 326 IAC 8-9-6 shall keep all records required by subsection (b) for the life of the vessel. In accordance with 326 IAC 8-9-6(b), records of each vessel including the vessel identification number, dimensions, capacity, and a description of the emission control equipment shall be submitted to the address(es) listed in Section C – General Reporting Requirements, of this permit, upon request.

SECTION D.4 FACILITY OPERATION CONDITIONS – INSIGNIFICANT ACTIVITY

Facility Description [326 IAC 2-7-5(15)] Two (2) Dock Heaters No. 1 and No. 2, identified as Dock 1 and Dock 2, each rated at 0.75 MMBtu/hr. These units are natural gas-fired only.
(The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.4.1 Particulate Matter (PM), Sulfur Dioxide (SO₂), Nitrogen Oxide (NO_x), Volatile Organic Compound (VOC), and Carbon Monoxide (CO)

That emissions from the combustion of natural gas are governed by the Hammond Air Quality Control Ordinance No. 3522 (as amended) for the following pollutants: Particulate Matter (PM), Sulfur Dioxide (SO₂), Nitrogen Oxide (NO_x), Volatile Organic Compounds (VOC), and Carbon Monoxide (CO).

Compliance Determination Requirements

D.4.2 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM or HDEM may require compliance testing at any specific time when necessary to determine if these facilities are in compliance. If testing is required by IDEM or HDEM, compliance with the (PM) limit specified in Condition D.4.1 shall be determined by a performance test conducted in accordance with Section C – Performance Testing.

Compliance Monitoring Requirements [326 IAC 2-7-6(1)] [326 IAC 2-7-5(1)]

D.4.3 Compliance Monitoring

There are no compliance monitoring requirements applicable to these facilities.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.4.4 Record Keeping and Reporting Requirements

There are no record keeping and reporting requirements for these facilities.

SECTION D.5 FACILITY OPERATION CONDITIONS – INSIGNIFICANT ACTIVITY

Facility Description [326 IAC 2-7-5(15)] Two (2) Closed Top Degreasers (one (1) 20 gallon capacity citrus-based, remotely stored and one (1) 55 gallon capacity solvent-based, not remotely stored). (The information describing the process contained in this facility description box is descriptive information and does not constitute enforceable conditions.)

Emission Limitations and Standards [326 IAC 2-7-5(1)]

D.5.1 Volatile Organic Compounds (VOC)

Pursuant to 326 IAC 8-3-2 (Cold Cleaner Operations) for cold cleaning operations existing as of January 1, 1980, the owner or operator shall:

- (a) Equip the cleaner with a cover;
- (b) Equip the cleaner with a facility for draining cleaned parts;
- (c) Close the degreaser cover whenever parts are not being handled in the cleaner;
- (d) Drain cleaned parts for at least fifteen (15) seconds or until dripping ceases;
- (e) Provide a permanent, conspicuous label summarizing the operation requirements;
- (f) Store waste solvent only in covered containers and not dispose of waste solvent or transfer it to another party, in such a manner that greater than twenty percent (20%) of the waste solvent (by weight) can evaporate into the atmosphere.

D.5.2 Volatile Organic Compounds (VOC)

Cold cleaner degreasers without remote solvent reservoirs:

- (a) Pursuant to 326 IAC 8-3-5(a) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaner degreaser facility existing as of July 1, 1990, shall ensure that the following control equipment requirements are met:
 - (1) Equip the degreaser with a cover. The cover must be designed so that it can be easily operated with one (1) hand if:
 - (A) The solvent volatility is greater than two (2) kiloPascals (fifteen (15) millimeters of mercury or three-tenths (0.3) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F));
 - (B) The solvent is agitated; or
 - (C) The solvent is heated.
 - (2) Equip the degreaser with a facility for draining cleaned articles. If the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), then the drainage facility must be internal such that articles are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.

- (3) Provide a permanent, conspicuous label which lists the operating requirements outlined in subsection (b).
- (4) The solvent spray, if used, must be a solid, fluid stream and shall be applied at a pressure which does not cause excessive splashing.
- (5) Equip the degreaser with one (1) of the following control devices if the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38^oC) (one hundred degrees Fahrenheit (100^oF)), or if the solvent is heated to a temperature greater than forty-eight and nine-tenths degrees Celsius (48.9^oC) (one hundred twenty degrees Fahrenheit (120^oF)):
 - (A) A freeboard that attains a freeboard ratio of seventy-five hundredths (0.75) or greater.
 - (B) A water cover when solvent is used is insoluble in, and heavier than, water.
 - (C) Other systems of demonstrated equivalent control such as a refrigerated chiller or carbon adsorption. Such systems shall be submitted to the U.S. EPA as a SIP revision.
- (b) Pursuant to 326 IAC 8-3-5(b) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaning facility existing as of July 1, 1990, shall ensure that the following operating requirements are met:
 - (1) Close the cover whenever articles are not being handled in the degreaser.
 - (2) Drain cleaned articles for at least fifteen (15) seconds or until dripping ceases.
 - (3) Store waste solvent only in covered containers and prohibit the disposal or transfer of waste solvent in any manner in which greater than twenty percent (20%) of the waste solvent by weight could evaporate.

Record Keeping and Reporting Requirements [326 IAC 2-7-5(3)] [326 IAC 2-7-19]

D.5.3 Record Keeping Requirement

- (a) To document compliance with Conditions D.5.2, the Permittee shall maintain records in accordance with (1) through (6) below. Records maintained for (1) through (6) shall be taken monthly and shall be complete and sufficient to establish compliance with the VOC usage limits and/or the VOC emission limits established in Conditions D.5.2.
 - (1) The amount and VOC and HAP content of each coating material and solvent used. Records shall include purchase orders, invoices, and material safety data sheets (MSDS) necessary to verify the type and amount used. Solvent usage records shall differentiate between those added to coatings and those used as cleanup solvents;
 - (2) A log of the dates of use;
 - (3) The volume weighted VOC and HAP content of the coatings used for each month;

-
- (4) The cleanup solvent usage for each month;
 - (5) The total VOC and HAP usage for each month; and
 - (6) The weight of VOC and HAP emitted for each compliance period.
- (b) These records shall be maintained in accordance with Section C - General Record Keeping Requirements.

D.5.4 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.5.3 shall be submitted to the address(es) listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

Addendum to the
Technical Support Document for a Part 70 Operating Permit

Source Name: **Silgan Containers Manufacturing Corporation**
Source Location: 2501 – 165th Street, Hammond, Indiana 46320
County: Lake
SIC Code: 3479 & 3411 – Metal Coil Coating for Can Manufacturers, Coated Steel and Aluminum Coils
Operation Permit No.: T089-6900-00202
Permit Reviewer: Debra Malone, HDEM

On August 28, 2000, the Hammond Department of Environmental Management (HDEM) had a notice published in the Times, Hammond, Indiana, stating that Silgan Containers Manufacturing Corporation had applied for a Part 70 Operating Permit to operate a Metal Coil Coating for Can Manufacturing Plant. The notice also stated that HDEM proposed to issue a permit for this operation and provided information on how the public could review the proposed permit and other documentation. Finally, the notice informed interested parties that there was a period of thirty (30) days to provide comments on whether or not this permit should be issued as proposed. No comments were made during this period.

Following the public comment period for this permit, IDEM-OAM made changes to the model permit (dated 8/3/00). This Part 70 Operation Permit No. T089-6900-00202 has been modified to make it consistent with the 10/20/00 model. Also, per the 1/5/01 model change, all references to the Office of Air Management have been changed to the Office of Air Quality and OAM to OAQ. The following revisions have been made to the permit (bolded language has been added, the language with a line through it has been deleted). The Table Of Contents has been modified to reflect these changes.

Front Page

1. The signature boxes have been modified. The expiration date has been added to the signature box. The redundant Issuance Date and permit number have been removed.

Section A

1. On page 6 of 50 (now page 5 of 45), A.1 (General Information) the following rule cite which is the definition of a major source in 326 IAC 2-7 has been added. The telephone number of the contact person has been removed.

A.1 General Information [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)] [326 IAC 2-7-1(22)]

The Permittee owns and operates a stationary, metal coil coating for can manufacturers operation, that coats steel and aluminum coils.

Responsible Official: Roger Mentz, Plant Manager
Source Address: 2501 – 165th Street, Hammond, Indiana 46320
Mailing Address: (same)
~~Phone Number: (219) 845-1500~~
SIC Code: 3479 & 3411 - Metal Coil Coating for Can Manufacturers,
Coated Steel and Aluminum Coils
County Location: Lake
Source Location Status: Attainment/Unclassifiable for CO, NO₂ and Lead,
Primary Nonattainment for SO₂,
Moderate Nonattainment for PM₁₀, and
Severe Nonattainment for Ozone.
Source Status: Part 70 Permit Program
Major Source, under Emission Offset Rules;
Major Source, Section 112 of the Clean Air Act
Not 1 of 28 source categories listed under 326 IAC 2-2

2. On page 6 of 50 (now page 5 of 45), A.2 (Emission Units and Pollution Control Equipment Summary) the dates of construction were added to the facility descriptions.

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-7-4(c)(3)] [326 IAC 2-7-5(15)]

This stationary source consists of the following emission units and pollution control devices:

- (a) One (1) Coil Coating Line, identified as Oven and Oxidizer 1, **constructed in 1957**, with a maximum line speed of 600 ft/min and maximum heat input rate of 44 MMBtu/hr and 20 MMBtu/hr, respectively (total combined capacity 64 MMBtu/hr), natural gas-fired only. The application method is roll coating. The VOC emissions from this line are controlled by one (1) fume incinerator which exhausts to stacks, identified as OX 1 and OX 3. This line also includes ten (10) mixing tanks, identified as MT 1 – MT 10, **constructed in 1984**, each with a maximum capacity of 290 gallons.
- (b) Three (3) Rapid Engineering Spaceheaters, identified as AMU 1, AMU 2, and AMU 3, **constructed in 1996**, each rated at 9.65 MMBtu/hr and natural gas-fired only.
- (c) Seven (7) Indoor Vertical, Fixed-Roof Storage Tanks, identified as Tanks 1 – 7, Tanks 1 – 5 each with a maximum capacity of 12,000 gallons, **constructed in 1970**, and Tanks 6

& 7 each with a maximum capacity of 10,000 gallons, **constructed in 1995**, venting to TV 1 – TV 7. These seven tanks are used to store various solvents and coatings.

- (d) Two (2) Dock Heaters No. 1 and No. 2, identified as Dock 1 and Dock 2, **constructed in 1969**, each rated at 0.75 MMBtu/hr and natural gas-fired only.

Section B

1. On page 9 of 50 (now page 7 of 45), B.1 (Permit No Defense) has been deleted. This is not in IC13, but we do have the general authority for this in 326 IAC 2-7-15. Therefore, most of this language has been added to B.14 (Permit Shield). B.14 provides for when the possession of a permit does provide a defense and provides that it is only for those requirements in existence at the time of permit issuance. All other B conditions have been re-numbered as a result of this change.

~~B.1 Permit No Defense [IC 13]~~

- ~~(a) Indiana statutes from IC 13 and rules from 326 IAC, quoted in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7.~~
- ~~(b) This prohibition shall not apply to alleged violations of applicable requirements for which the Commissioner has granted a permit shield in accordance with 326 IAC 2-7-15, as set out in this permit in the Section B condition entitled "Permit Shield."~~

2. On page 9 of 50, B.3 (now page 7 of 45, B.2) (Permit Term) language has been added to clarify that amendments, revisions or modifications do not extend the expiration date of the permit. The expiration date will always be 5 years from the issuance date of the original permit. The expiration date will now be typed in the signature box as well.

B.32 Permit Term [326 IAC 2-7-5(2)]

This permit is issued for a fixed term of five (5) years from the **effective original** date, as determined in accordance with IC 4-21.5-3-5(f) and IC 13-15-5-3. **Subsequent revisions, modifications, or amendments of this permit do not affect the expiration date.**

3. On page 10 of 50, B.8 (now page 7 of 45, B.7) (Duty to Supplement and Provide Information) The condition has been reworded to match the language in the rule.

B.87 Duty to Supplement and Provide Information [326 IAC 2-7-4(b)] [326 IAC 2-7-5(6)(E)] **[326 IAC 2-7-6(6)]**

- (a) The Permittee, upon becoming aware that any relevant facts were omitted or incorrect information was submitted in the permit application, shall promptly submit such supplementary facts or corrected information to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Management Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The submittal by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall furnish to IDEM-OAMQ and HDEM, within a reasonable time, any information that IDEM-OAMQ and HDEM may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The submittal by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34). **Upon request, the Permittee shall also furnish to IDEM-OAMQ and HDEM copies of records required to be kept by this permit or, for information claimed to be confidential, the Permittee may furnish such records directly to the U. S. EPA along with a claim of confidentiality. [326 IAC 2-7-5(6)(E)]**
- (c) ~~Upon request, the Permittee shall also furnish to IDEM-OAM and HDEM copies of records required to be kept by this permit. The Permittee may include a claim of confidentiality in accordance with 326 IAC 17. If requested by IDEM-OAM or the U.S. EPA, to~~ **When** furnishing copies of requested records directly to U. S. EPA, ~~then the Permittee must furnish record directly to the U.S. EPA. The~~ Permittee may assert a claim of confidentiality in accordance with 40 CFR 2, Subpart B.

4. On page 10 of 50, B.9 (now page 8 of 45, B.8) (Compliance with Permit Conditions) (c) has been added to clarify that an emergency does constitute a defense in an enforcement action if the Permittee complies with the emergency procedures.

B.98 Compliance with Permit Conditions [326 IAC 2-7-5(6)(A)] [326 IAC 2-7-5(6)(B)]

- (a) The Permittee must comply with all conditions of this permit. Noncompliance with any provisions of this permit, except those specifically designated as not federally enforceable, constitutes a violation of the Clean Air Act and is grounds for:
- (1) Enforcement action;
 - (2) Permit termination, revocation and reissuance, or modification; or
 - (3) Denial of a permit renewal application.
- (b) It shall not be a defense for the Permittee in an enforcement action that it would have

been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

- (c) **An emergency does constitute an affirmative defense in an enforcement action provided the Permittee complies with the applicable requirements set forth in condition B, Emergency Provisions.**

5. On page 11 of 50, B.10 (now page 8 of 45, B.9) (Certification) (b) has been modified to clarify when a certification is needed.

B.409 Certification [326 IAC 2-7-4(f)] [326 IAC 2-7-6(1)] [326 IAC 2-7-5(3)C]

- (b) One (1) certification shall be included, ~~on~~ **using** the attached Certification Form, with each submittal **requiring certification**.

6. On page 11 of 50, B.11 (now page 8 of 45, B.10) (Annual Compliance Certification) paragraph (a) has been revised to clarify that the initial certification is from the date of issuance until Dec. 31. Paragraph (c) has been revised so that it matches the language in the rule.

B.140 Annual Compliance Certification [326 IAC 2-7-6(5)]

- (a) The Permittee shall annually submit a compliance certification report which addresses the status of the source's compliance with the terms and conditions contained in this permit, including emission limitations, standards, or work practices. **The initial certification shall cover the time period from the date of final permit issuance through December 31 of the same year. All subsequent** ~~The certifications~~ shall cover the time period from January 1 to December 31 of the previous year, and shall be submitted in letter form no later than **April 15th** of each year to:

Indiana Department of Environmental Management
Compliance Data Section, Office of Air ~~Management~~ **Quality**
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Air Enforcement Branch - Indiana (AE-17J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

- (b) The annual compliance certification report required by this permit shall be considered

timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM-OAMQ and HDEM on or before the date it is due.

- (c) The annual compliance certification report shall include the following:
- (1) The appropriate identification of each term or condition of this permit that is the basis of the certification;
 - (2) The compliance status;
 - (3) Whether compliance was continuous or intermittent;
 - (4) The methods used for determining compliance **status** of the source, currently and over the reporting period consistent with 326 IAC 2-7-5(3); and
 - (5) Such other facts, as specified in Sections D of this permit, as IDEM-OAMQ and HDEM may require to determine the compliance status of the source.

The submittal by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

7. On page 12 of 50, B.12 (now page 9 of 45, B.11) (Preventive Maintenance Plan) the record keeping requirements have been added to this condition.

B.121 Preventive Maintenance Plan [326 IAC 2-7-5(1),(3) and (13)] [326 IAC 2-7-6(1) and (6)] [326 IAC 1-6-3]

- (a) If required by specific condition(s) in Section D of this permit, the Permittee shall prepare and maintain Preventive Maintenance Plans (PMPs) within **ninety (90) days** after issuance of this permit, including the following information on each facility:
- (1) Identification of the individual(s) responsible for inspecting, maintaining, and repairing emission control devices;
 - (2) A description of the items or conditions that will be inspected and the inspection schedule for said items or conditions; and
 - (3) Identification and quantification of the replacement parts that will be maintained in inventory for quick replacement.

If, due to circumstances beyond ~~it's~~ **the Permittee's** control, the PMPs cannot be prepared and maintained within the above time frame, the Permittee may extend the date an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air Management- ~~Quality~~
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The PMP and the PMP extension notification do not require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (b) The Permittee shall implement the PMPs as necessary to ensure that failure to implement a PMP does not cause or contribute to a violation of any limitation on emissions or potential to emit.
 - (c) A copy of the PMP’s shall be submitted to IDEM-OAMQ and HDEM upon request and within a reasonable time, and shall be subject to review and approval by IDEM-OAMQ and HDEM. IDEM-OAMQ and HDEM may require the Permittee to revise its PMPs whenever lack of proper maintenance causes or contributes to any violation. The PMP does not require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).
 - (d) **Records of preventive maintenance shall be retained for a period of at least five (5) years. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner or HDEM makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner or HDEM within a reasonable time.**
8. On page 13 of 50, B.13 (now page 10 of 45, B.12) (Emergency Provisions) a reference to the Emergency Occurrence Report Form has been added to B.13 (b)(5). The emergency form is for emergencies only, and is no longer an emergency and deviation form. All deviations will now be reported on the Quarterly Deviation and Compliance Monitoring Report. Paragraph (d) part of the first sentence has been deleted. Since we know it is a TV source, then we also know the malfunction rule has been superceded by the emergency rule. Paragraph (f) “compliance” has been changed to “accordance”.

B.132 Emergency Provisions [326 IAC 2-7-16]

- (a) An emergency, as defined in 326 IAC 2-7-1(12), is not an affirmative defense for an action brought for noncompliance with a federal or state health-based emission limitation, except as provided in 326 IAC 2-7-16.
- (b) An emergency, as defined in 326 IAC 2-7-1(12), constitutes an affirmative defense to an action brought for noncompliance with a health-based or technology-based emission limitation if the affirmative defense of an emergency is demonstrated through properly

signed, contemporaneous operating logs or other relevant evidence that describe the following:

- (1) An emergency occurred and the Permittee can, to the extent possible, identify the causes of the emergency;
- (2) The permitted facility was at the time being properly operated;
- (3) During the period of an emergency, the Permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in this permit;
- (4) For each emergency lasting one (1) hour or more, the Permittee notified IDEM-OAMQ and HDEM within four (4) daytime business hours after the beginning of the emergency, or after the emergency was discovered or reasonably should have been discovered;

IDEM

Telephone Number: 1-800-451-6027 (ask for Office of Air ~~Management~~ **Quality**, Compliance Section),

or

Telephone Number: 317-233-5674 (ask for Compliance Section)

Facsimile Number: 317-233-5967

HDEM

Telephone Number: 219-853-6306

Facsimile Number: 219-853-6343

- (5) For each emergency lasting one (1) hour or more, the Permittee submitted **the attached Emergency Occurrence Report Form or its equivalent** notice, either ~~in writing by mail or facsimile, of the emergency to:~~

Indiana Department of Environmental Management
Compliance Branch, Office of Air ~~Management~~ **Quality**
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

within two (2) working days of the time when emission limitations were exceeded due to the emergency.

The notice fulfills the requirement of 326 IAC 2-7-5(3)(C)(ii) and must contain the following:

- (A) A description of the emergency;

(B) Any steps taken to mitigate the emissions; and

(C) Corrective actions taken.

The notification which shall be submitted by the Permittee does not require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

(6) The Permittee immediately took all reasonable steps to correct the emergency.

(c) In any enforcement proceeding, the Permittee seeking to establish the occurrence of an emergency has the burden of proof.

(d) This emergency provision supersedes 326 IAC 1-6 (Malfunctions) ~~for sources subject to this rule after the effective date of this rule.~~ This permit condition is in addition to an emergency or upset provision contained in any applicable requirement.

(e) IDEM-OAMQ and HDEM may require that the Preventive Maintenance Plans required under 326 IAC 2-7-4-(c)(10) be revised in response to an emergency.

(f) Failure to notify IDEM-OAMQ and HDEM by telephone or facsimile of an emergency lasting more than one (1) hour in ~~compliance~~ **accordance** with (b)(4) and (5) of this condition shall constitute a violation of 326 IAC 2-7 and any other applicable rules.

(g) Operations may continue during an emergency only if the following conditions are met:

(1) If the emergency situation causes a deviation from a technology-based limit, the

Permittee may continue to operate the affected emitting facilities during the emergency provided the Permittee immediately takes all reasonable steps to correct the emergency and minimize emissions.

(2) If an emergency situation causes a deviation from a health-based limit, the Permittee may not continue to operate the affected emissions facilities unless:

(A) The Permittee immediately takes all reasonable steps to correct the emergency situation and to minimize emissions; and

(B) Continued operation of the facilities is necessary to prevent imminent injury to persons, severe damage to equipment, substantial loss of capital investment, or loss of product or raw materials of substantial economic value.

Any operation shall continue no longer than the minimum time required to prevent the situations identified in (g)(2)(B) of this condition.

9. On page 15 of 50, B.14 (now page 12 of 45, B.13) (Permit Shield) some of the language from B.1 has been added to it. B.14 (d) some of the language has been removed because it is

unnecessary and would be contradictory to our revising operating permits. Construction permit terms are covered in the definition of applicable requirements.

B.143 Permit Shield [326 IAC 2-7-15] [326 IAC 2-7-20] [326 IAC 2-7-12]

- (a) Pursuant to 326 IAC 2-7-15, the Permittee has been granted a permit shield. The permit shield provides that compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance, provided that either the applicable requirements are included and specifically identified in this permit or the permit contains an explicit determination or concise summary of a determination that other specifically identified requirements are not applicable. **The Indiana statutes from IC 13 and rules from 326 IAC, referenced in conditions in this permit, are those applicable at the time the permit was issued. The issuance or possession of this permit shall not alone constitute a defense against an alleged violation of any law, regulation or standard, except for the requirement to obtain a Part 70 permit under 326 IAC 2-7 or for applicable requirements for which a permit shield has been granted.**

This permit shield does not extend to applicable requirements which are promulgated after the date of issuance of this permit unless this permit has been modified to reflect such new requirements.

- (b) This permit shall be used as the primary document for determining compliance with applicable requirements established by previously issued permits. All previously issued operating permits are superceded by this permit.
- (c) If, after issuance of this permit, it is determined that the permit is in nonconformance with an applicable requirement that applied to the source on the date of permit issuance, ~~including any term or condition from a previously issued construction or operation permit, IDEM-OAMQ or HDEM~~ shall immediately take steps to reopen and revise this permit and issue a compliance order to the Permittee to ensure expeditious compliance with the applicable requirement until the permit is reissued. The permit shield shall continue in effect so long as the Permittee is in compliance with the compliance order.
- (d) No permit shield shall apply to any permit term or condition that is determined after issuance of this permit to have been based on erroneous information supplied in the permit application. Erroneous information means information that the Permittee knew to be false, or in the exercise of reasonable care should have been known to be false, at the time the information was submitted.
- (e) Nothing in 326 IAC 2-7-15 or in this permit shall alter or affect the following:
- (1) The provisions of Section 303 of the Clean Air Act (emergency orders), including the authority of the U.S. EPA under Section 303 of the Clean Air Act;
 - (2) The liability of the Permittee for any violation of applicable requirements prior to or at the time of this permit's issuance;
 - (3) The applicable requirements of the acid rain program, consistent with Section 408(a) of the Clean Air Act; and

- (4) The ability of U.S. EPA to obtain information from the Permittee under Section 114 of the Clean Air Act.
 - (f) This permit shield is not applicable to any change made under 326 IAC 2-7-20(b)(2) (Sections 502(b)(10) of the Clean Air Act changes) and 326 IAC 2-7-20(c)(2) (trading based on State Implementation Plan (SIP) provisions).
 - (g) This permit shield is not applicable to modifications eligible for group processing until after IDEM-OAMQ or HDEM has issued the modifications. [326 IAC 2-7-12(c)(7)]
 - (h) This permit shield is not applicable to minor Part 70 permit modifications until after IDEM-OAMQ or HDEM has issued the modification. [326 IAC 2-7-12(b)(7)]
10. On page 16 of 50, B.16 (now page 13 of 45, B.15) (Deviations from Permit Requirements and Conditions) we are no longer requiring sources to report deviations in 10 days. Now they will report deviations quarterly on the Quarterly Deviation and Compliance Monitoring Report. References to the emergency report have been removed since deviations will not be reported on that form anymore. There is no longer a 5% exception for reporting deviations, since we relaxed the 10 day notification to a quarterly report.

B.165 Deviations from Permit Requirements and Conditions [326 IAC 2-7-5(3)(C)(ii)]

- (a) Deviations from any permit requirements (for emergencies see Section B - Emergency Provisions), the probable cause of such deviations, and any response steps or preventive measures taken shall be reported to:

Indiana Department of Environmental Management
Compliance ~~Branch~~ **Data Section**, Office of Air ~~Management~~ **Quality**
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

~~within ten (10) calendar days from the date of the discovery of the deviation except for the failure to perform the monitoring or record the information required by the compliance monitoring provisions of Section D unless such failure exceeds 5% of the required data in any calendar quarter.~~ **using the attached Quarterly Deviation and Compliance Monitoring Report, or its equivalent. Deviations that are required to be reported by an applicable requirement shall be reported according to the schedule stated in the applicable requirement and do not need to be included in this report.**

The notification by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (b) A deviation is an exceedance of a permit limitation or a failure to comply with a requirement of the permit or a rule. It does not include:
- (1) An excursion from compliance monitoring parameters as identified in Section D of this permit unless tied to an applicable rule or limit; or
 - ~~(2) An emergency as defined in 326 IAC 2-7-1(12); or~~
 - ~~(3)(2)~~ Failure to implement elements of the Preventive Maintenance Plan unless such failure has caused or contributed to a deviation.

A Permittee's failure to take the appropriate response step when an excursion of a compliance monitoring parameter has occurred is a deviation.

(c) Emergencies shall be included in the Quarterly Deviation and Compliance Monitoring Report.

- ~~(c) Written notification shall be submitted on the attached Emergency/Deviation Occurrence Reporting Form or its substantial equivalent. The notification does not need to be certified by the "responsible official" as defined by 326 IAC 2-7-1(34).~~
- ~~(d) Proper notice submittal under 326 IAC 2-7-16 satisfies the requirement of this subsection.~~

11. On page 17 of 50, B.17 (now page 14 of 45, B.16) (Permit Modification, Reopening, Revocation and Reissuance, or Termination) the "and" has been changed to "or" since the reopening could be done by either the local or the state agency.

B.176 Permit Modification, Reopening, Revocation and Reissuance, or Termination
[326 IAC 2-7-5(6)(C)] [326 IAC 2-7-8(a)] [326 IAC 2-7-9]

- (a) This permit may be modified, reopened, revoked and reissued, or terminated for cause. The filing of a request by the Permittee for a Part 70 permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of this permit. [326 IAC 2-7-5(6)(C)] The notification by the Permittee does require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).
- (b) This permit shall be reopened and revised under any of the circumstances listed in IC 13-15-7-2 or if IDEM-OAMQ or HDEM determines any of the following:
- (1) That this permit contains a material mistake.
 - (2) That inaccurate statements were made in establishing the emissions standards or other terms or conditions.
 - (3) That this permit must be revised or revoked to assure compliance with an applicable requirement. [326 IAC 2-7-9(a)(3)]
- (c) Proceedings by IDEM-OAMQ or HDEM to reopen and revise this permit shall follow the

same procedures as apply to initial permit issuance and shall affect only those parts of this permit for which cause to reopen exists. Such reopening and revision shall be made as expeditiously as practicable. [326 IAC 2-7-9(b)]

- (d) The reopening and revision of this permit, under 326 IAC 2-7-9(a), shall not be initiated before notice of such intent is provided to the Permittee by IDEM-OAMQ or HDEM at least thirty (30) days in advance of the date this permit is to be reopened, except that IDEM-OAMQ and or HDEM may provide a shorter time period in the case of an emergency. [326 IAC 2-7-9(c)]

12. On page 19 of 50, B.19 (now page 16 of 45, B.18) (Permit Amendment or Modification) 326 IAC 2-7-4(f) requires all applications to be certified by the responsible official, therefore this condition has been revised to clarify that. EPA has also requested this change.

B.198 Permit Amendment or Modification [326 IAC 2-7-11] [326 IAC 2-7-12]

- (a) Permit amendments and modifications are governed by the requirements of 326 IAC 2-7-11 or 326 IAC 2-7-12 whenever the Permittee seeks to amend or modify this permit.
- (b) Any application requesting an amendment or modification of this permit shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Management **Quality**
100 North Senate Avenue, P.O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

Any such application should be certified by the “responsible official” as defined by 326 IAC 2-7-1(34) ~~only if a certification is required by the terms of the applicable rule.~~

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request. [326 IAC 2-7-11(c)(3)]

13. On page 20 of 50, B.21 (now page 16 of 45, B.20) (Operational Flexibility) (b) has been reorganized a bit. Paragraph (b)(1) was taken out so the condition would be consistent with the language in the rule.

B.240 Operational Flexibility [326 IAC 2-7-20] [326 IAC 2-7-10.5]

- (a) The Permittee may make any change or changes at the source that are described in 326 IAC 2-7-20(b), (c), or (e), without a prior permit revision, if each of the following conditions

is met:

- (1) The changes are not modifications under any provision of Title I of the Clean Air Act;
- (2) Any preconstruction approval required by 326 IAC 2-7-10.5 has been obtained;
- (3) The changes do not result in emissions which exceed the emissions allowable under this permit (whether expressed herein as a rate of emissions or in terms of total emissions);
- (4) The Permittee notifies the:

Indiana Department of Environmental Management
Permits Branch, Office of Air Management Quality
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

and

United States Environmental Protection Agency, Region V
Air and Radiation Division, Regulation Development Branch - Indiana (AR-18J)
77 West Jackson Boulevard
Chicago, Illinois 60604-3590

in advance of the change by written notification at least ten (10) days in advance of the proposed change. The Permittee shall attach every such notice to the Permittee's copy of this permit; and

- (5) The Permittee maintains records on-site which document, on a rolling five (5) year basis, all such changes and emissions trading that are subject to 326 IAC 2-7-20(b), (c), or (e) and makes such records available, upon reasonable request, for public review.

Such records shall consist of all information required to be submitted to IDEM-OAMQ and HDEM in the notices specified in 326 IAC 2-7-20(b), (c)(1), and (e)(2).

- (b) The Permittee may make Section 502(b)(10) of the Clean Air Act changes (this term is defined at 326 IAC 2-7-1(36)) without a permit revision, subject to the constraint of 326 IAC 2-7-20(a). ~~and the following additional conditions:~~

- ~~(1) The permit shield, described in 326 IAC 2-7-15, shall not apply to any change made under 326 IAC 2-7-20(b).~~

- ~~(2)~~ For each such Section 502(b)(10) of the Clean Air Act change, the required written notification shall include the following:
- ~~(A)~~(1) A brief description of the change within the source;
 - ~~(B)~~(2) The date on which the change will occur;
 - ~~(C)~~(3) Any change in emissions; and
 - ~~(D)~~(4) Any permit term or condition that is no longer applicable as a result of the change.

The notification which shall be submitted by the Permittee does not require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (c) Emission Trades [326 IAC 2-7-20(c)]
The Permittee may trade increases and decreases in emissions in the source, where the applicable SIP provides for such emission trades without requiring a permit revision, subject to the constraints of Section (a) of this condition and those in 326 IAC 2-7-20(c).
- (d) Alternative Operating Scenarios [326 IAC 2-7-20(d)]
The Permittee may make changes at the source within the range of alternative operating scenarios that are described in the terms and conditions of this permit in accordance with 326 IAC 2-7-5(9). No prior notification of IDEM-OAMQ, HDEM, or U.S. EPA is required.

14. On page 21 of 50, B.22 (now page 18 of 45, B.21) (Source Modification Requirement) 326 IAC 2 has been added to make the condition more complete. The language “applicable provisions” has been removed because it is unnecessary.

B.221 Source Modification Requirement [326 IAC 2-7-10.5]

A modification, construction, or reconstruction is governed by ~~the applicable provisions of 326 IAC 2 and~~ 326 IAC 2-7-10.5.

15. On page 22 of 50, B.23 (now page 18 of 45, B.22) (Inspection and Entry) “At reasonable times” has been deleted because neither the rule nor the statute limit us. We could ask for those things at any time.

B.232 Inspection and Entry [326 IAC 2-7-6(2)] [IC 13-14-2-2]

Upon presentation of proper identification cards, credentials, and other documents as may be required by law, and subject to the Permittee's right under all applicable laws and regulations to assert that the information collected by the agency is confidential and entitled to be treated as such, the Permittee shall allow IDEM-OAMQ, HDEM, U.S. EPA, or an authorized representative to perform the following:

- (a) Enter upon the Permittee's premises where a Part 70 source is located, or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
 - (b) Have access to and copy, ~~at reasonable times~~, any records that must be kept under the conditions of this permit;
 - (c) Inspect, ~~at reasonable times~~, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit;
 - (d) Sample or monitor, ~~at reasonable times~~, substances or parameters for the purpose of assuring compliance with this permit or applicable requirements; and
 - (e) Utilize any photographic, recording, testing, monitoring, or other equipment for the purpose of assuring compliance with this permit or applicable requirements.
~~[326 IAC 2-7-6(6)]~~
16. On page 22 of 50, B.24 (now page 18 of 45, B.23) (Transfer of Ownership or Operational Control) 326 IAC 2-7-4(f) requires all applications to be certified by the responsible official, therefore this condition has been revised to clarify that. EPA has also requested this change.

B.243 Transfer of Ownership or Operational Control [326 IAC 2-7-11]

- (a) The Permittee must comply with the requirements of 326 IAC 2-7-11 whenever the Permittee seeks to change the ownership or operational control of the source and no other change in the permit is necessary.
- (b) Any application requesting a change in the ownership or operational control of the source shall contain a written agreement containing a specific date for transfer of permit responsibility, coverage and liability between the current and new Permittee. The application shall be submitted to:

Indiana Department of Environmental Management
Permits Branch, Office of Air Management **Quality**
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

The application which shall be submitted by the Permittee does ~~not~~ require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- (c) The Permittee may implement administrative amendment changes addressed in the request for an administrative amendment immediately upon submittal of the request.
[326 IAC 2-7-11(c)(3)]

17. On page 23 of 50, B.25 (now page 19 of 45, B.24) (Annual Fee Payment) a rule cite was added to paragraph (a).

B.254 Annual Fee Payment [326 IAC 2-7-19] [326 IAC 2-7-5(7)]

- (a) The Permittee shall pay annual fees to IDEM-OAMQ and HDEM within thirty (30) calendar days of receipt of a billing. **Pursuant to 326 IAC 2-7-19(b)**, if the Permittee does not receive a bill from IDEM-OAMQ and HDEM the applicable fee is due April 1 of each year.
- (b) Except as provided in 326 IAC 2-7-19(e), failure to pay may result in administrative enforcement action or revocation of this permit.
- (c) The Permittee may call the following telephone numbers: 1-800-451-6027 or 317-233-0425 (ask for OAMQ, Technical Support and Modeling Section), to determine the appropriate permit fee.

18. On page 23 of 50, B.26 (now page 19 of 45, B.25) (Advanced Source Modification Approval) language was added to clarify the requirements of paragraph (b).

B.265 Advanced Source Modification Approval [326 IAC 2-7-5(16)] [326 IAC 2-7-10.5]

- (a) The requirements to obtain a source modification approval under 326 IAC 2-7-10.5 or a permit modification under 326 IAC 2-7-12 are satisfied by this permit for the proposed emission units, control equipment or insignificant activities in Sections A.2 and A.3.
- (b) Pursuant to 326 IAC 2-1.1-9 any permit authorizing construction may be revoked if ~~failure to commence~~ construction of the emission unit **has not commenced** within eighteen (18) months from the date of issuance of the permit, or if during the construction of work is suspended for a continuous period of one (1) year or more.

Section C

1. On page 24 of 50 (now page 20 of 45), C.2 (Opacity) the parenthesis has been moved as follows:

C.2 Opacity [326 IAC 5-1]

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of twenty percent (20%) in any one (1) six (6) minute averaging period as determined in 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings) as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

2. On page 24 of 50 (now page 20 of 45), C.6 (Fugitive Dust Emissions) has been removed from the permit and the conditions following have been renumbered. 326 IAC 6-1-11.1 applies to facilities and operations at a source having the potential to emit five (5) tons per year fugitive particulate matter into the atmosphere in Lake County or is one of the sources located in Lake County listed in 326 IAC 326 IAC 6-1-11.1(a)(2). The facilities and operations at this source do not have the potential to emit five (5) tons per year fugitive particulate matter and Silgan is not one of the sources listed in 326 IAC 6-1-11.1(a)(2).

~~C.6 Fugitive Dust Emissions [326 IAC 6-1-11.1]~~

~~The Permittee shall be in violation of 326 IAC 6-1-11.1 (Lake County Fugitive Particulate Matter Control Requirements), if the opacity of fugitive particulate emissions exceeds ten percent (10%).~~

3. On page 25 of 50, C.7 (now page 20 of 45, C.6) (Operation of Equipment) the following revisions were made to clarify the condition.

C.7 Operation of Equipment [326 IAC 2-7-6(6)]

Except as otherwise provided **by statute, rule, or** in this permit, all air pollution control equipment listed in this permit and used to comply with an applicable requirement shall be operated at all times that the emission unit(s) vented to the control equipment are in operation.

4. On page 25 of 50, C.8 (now page 20 of 45, C.7) (Stack Height) language has been added to clarify which parts of 326 IAC 1-7 are not federally enforceable.

C.87 Stack Height [326 IAC 1-7]

The Permittee shall comply with the applicable provisions of 326 IAC 1-7 (Stack Height Provisions), for all exhaust stacks through which a potential (before controls) of twenty-five (25) tons per year or more of particulate matter or sulfur dioxide is emitted. **The provisions of 326 IAC 1-7-2, 326 IAC 1-7-3(c) and (d), 326 IAC 1-7-4(d)(3), (e), and (f), and 326 IAC 1-7-5(d) are not federally enforceable.**

5. On page 25 of 50, C.9 (now page 21 of 45, C.8) (Asbestos Abatement Projects) the rule cite in the title was changed to make it more generalized.

C.98 Asbestos Abatement Projects [326 IAC 14-10] [326 IAC 18] ~~[40 CFR 61.140]~~
[40 CFR 61, Subpart M]

6. On page 26 of 50, C.10 (now page 22 of 45, C.9) (Performance Testing) “within” has been changed to “not later than”.

C.409 Performance Testing [326 IAC 3-6]

- (c) Pursuant to 326 IAC 3-6-4(b), all test reports must be received by IDEM-OAMQ and HDEM ~~within~~ **not later than** forty-five (45) days after the completion of the testing. An extension may be granted by IDEM-OAMQ and HDEM, if the source submits to IDEM-OAMQ and HDEM, a reasonable written explanation ~~within~~ **not later than** five (5) days prior to the end of the initial forty-five (45) day period.

7. On page 27 of 50, C.12 (now page 22 of 45, C.11) (Compliance Monitoring) there are times when compliance monitoring is required by a MACT that the source does not have to comply with yet. Therefore, language has been added to clarify that the permit will specify when CM doesn't have to start in 90 days. The same idea applies to new units, if the MACT doesn't apply yet, we would not expect the source to start compliance monitoring.

C.121 Compliance Monitoring [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

Unless otherwise specified in this permit, All monitoring and record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance. If required by Section D, the Permittee shall be responsible for installing any necessary equipment and initiating any required monitoring related to that equipment. If due to circumstances beyond its control, that equipment cannot be installed and operated within ninety (90) days, the Permittee may extend the compliance schedule related to the equipment for an additional ninety (90) days provided the Permittee notifies:

Indiana Department of Environmental Management
Compliance Branch, Office of Air ~~Management~~ **Quality**
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015

and

Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320

in writing, prior to the end of the initial ninety (90) day compliance schedule, with full justification of the reasons for the inability to meet this date.

The notification which shall be submitted by the Permittee does require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

Unless otherwise specified in the approval for the new emission unit(s), compliance monitoring for new emission units or emission units added through a source modification shall be implemented when operation begins.

8. On page 28 of 50, C.13 (now page 23 of 45, C.12) (Maintenance of Emission Monitoring Equipment) the language has been tweaked to clarify the intent.

C.132 Maintenance of Emission Monitoring Equipment [326 IAC 2-7-5(3)(A)(iii)]

- (a) In the event that a breakdown of the emission monitoring equipment occurs, a record shall be made of the times and reasons of the breakdown and efforts made to correct the problem. To the extent practicable, supplemental or intermittent monitoring of the parameter should be implemented at intervals no less frequent than required in Section D of this permit until such time as the monitoring equipment is back in operation. In the case of continuous monitoring, supplemental or intermittent monitoring of the parameter should be implemented at intervals no less than ~~one (1)~~ **once an** hour until such time as the continuous monitor is back in operation.
- (b) The Permittee shall install, calibrate, quality assure, maintain, and operate all necessary monitors and related equipment. In addition, prompt corrective action shall be initiated whenever indicated.

9. On page 28 of 50, C.14 (now page 23 of 45, C.13) (Monitoring Methods) the following rule cites have been added.

C.4413 Monitoring Methods [326 IAC 3] [40 CFR 60] [40 CFR 63]

Any monitoring or testing required by Section D of this permit shall be performed according to the provisions of 326 IAC 3, 40 CFR 60, Appendix A, **40 CFR 60 Appendix B, 40 CFR 63**, or other approved methods as specified in this permit.

10. On page 28 of 50, C.15 (now page 23 of 45, C.14) (Pressure Gauge Specifications) rule cites have been added. Language has been added for other instrument specifications.

C.154 Pressure Gauge and Other Instrument Specifications [326 IAC 2-1.1-11] [326 IAC 2-7-5(3)] [326 IAC 2-7-6(1)]

- (a) Whenever a condition in this permit requires the measurement of pressure drop across any part of the unit or its control device, the gauge employed shall have a scale such that the expected normal reading shall be no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.
- (b) **Whenever a condition in this permit requires the measurement of a temperature, the instrument employed shall have a scale such that the expected normal reading shall be no less than twenty percent (20%) of full scale and be accurate within plus or minus two percent ($\pm 2\%$) of full scale reading.**
- (c) **The Permittee may request the IDEM-OAMQ approve the use of a pressure gauge or other instrument that does not meet the above specifications provided the Permittee can demonstrate an alternative pressure gauge or other instrument specification will adequately ensure compliance with permit conditions requiring the measurement of pressure drop or other parameters.**

11. On page 28 of 50, C.16 (now page 24 of 45, C.15) (Emergency Reduction Plans) if the ERP is already submitted is doesn't make sense to say what needs to be in it. Therefore (c) and (d) have been deleted. An updated ERP was submitted to HDEM on January 9, 2001.

C.165 Emergency Reduction Plans [326 IAC 1-5-2] [326 IAC 1-5-3]

Pursuant to 326 IAC 1-5-2 (Emergency Reduction Plans; Submission):

- (a) The Permittee prepared and submitted written emergency reduction plans (ERPs) consistent with safe operating procedures on ~~February 13, 1994~~ **January 9, 2001**.
- (b) If the ERP is disapproved by IDEM-OAMQ or HDEM, the Permittee shall have an additional thirty (30) days to resolve the differences and submit an approvable ERP.
- ~~(c) These ERPs shall state those actions that will be taken, when each episode level is declared, to reduce or eliminate emissions of the appropriate air pollutants.~~
- ~~(d) Said ERPs shall also identify the sources of air pollutants, the approximate amount of reduction of the pollutants, and a brief description of the manner in which the reduction will be achieved.~~
- ~~(e)~~(c) Upon direct notification by IDEM-OAMQ or HDEM, that a specific air pollution episode level is in effect, the Permittee shall immediately put into effect the actions stipulated in the approved ERP for the appropriate episode level.
[326 IAC 1-5-3]

12. On page 29 of 50, C.17 (now page 24 of 45, C.16) (Risk Management Plan) if a source is subject to 40 CFR 68, they should have already submitted a Risk Management Plan.

C.176 Risk Management Plan [326 IAC 2-7-5(12)][40 CFR 68.215]

If a regulated substance, subject to 40 CFR 68, is present at a source in more than the threshold quantity, 40 CFR 68 is an applicable requirement and the Permittee shall submit:

- (a) A compliance schedule for meeting the requirements of 40 CFR 68 ~~by the date provided in 40 CFR 68.10(a)~~; or
- (b) As a part of the annual compliance certification submitted under 326 IAC 2-7-6(5), a certification statement that the source is in compliance with all the requirements of 40 CFR 68, including the registration and submission of a Risk Management Plan (RMP); and
- (c) A verification to IDEM-OAMQ and HDEM that a RMP or a revised plan was prepared and submitted as required by 40 CFR 68.

All documents submitted pursuant to this condition shall include the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

- 13.** On page 29 of 50, C.18 (now page 24 of 45, C.17) (Compliance Monitoring Plan - Failure to Take Response Steps) little grammatical changes were made upon a few reviewers request. (a) “of” was added. (c) “;or” has been replaced with a period. (f) “(5%)” has been added to be consistent with the rest of the permit. Also, changes were made to (a)(5) and (f) due to frequently asked questions.

C.187 Compliance Monitoring Plan - Failure to Take Response Steps [326 IAC 2-7-5][326 IAC 2-7-6]

- (a) The Permittee is required to implement a compliance monitoring plan to ensure that reasonable information is available to evaluate its continuous compliance with applicable requirements. The compliance monitoring plan can be either an entirely new document, consist in whole ~~of~~ information contained in other documents, or consist of a combination of new information and information contained in other documents. If the compliance monitoring plan incorporates by reference information contained in other documents, the Permittee shall identify as part of the compliance monitoring plan the documents in which the information is found. The elements of the compliance monitoring plan are;
 - (1) This condition;
 - (2) The Compliance Determination Requirements in Section D of this permit;
 - (3) The Compliance Monitoring Requirements in Section D of this permit;
 - (4) The Record Keeping and Reporting Requirements in Section C (Monitoring Data Availability, General Record Keeping Requirements, and General Reporting Requirements) and in Section D of this permit; and

-
- (5) A Compliance Response Plan (CRP) for each compliance monitoring condition of this permit. CRP's shall be submitted to IDEM-OAMQ and HDEM upon request and shall be subject to review and approval by IDEM-OAMQ and HDEM. The CRP shall be prepared within ninety (90) days after issuance of this permit by the Permittee and maintained on site, and is comprised of:
- (A) Reasonable response steps that may be implemented in the event that compliance related information indicates that a response step is needed pursuant to the requirements of Section D of this permit; and
 - (B) A time schedule for taking reasonable response steps including a schedule for devising additional response steps for situations that may not have been predicted.
- (b) For each compliance monitoring condition of this permit, reasonable response steps shall be taken when indicated by the provisions of that compliance monitoring condition. Failure to take reasonable response steps shall constitute a violation of the permit.
- (c) Upon investigation of a compliance monitoring excursion, the Permittee is excused from taking further response steps for any of the following reasons:
- (1) A false reading occurs due to the malfunction of the monitoring equipment. This shall be an excuse from taking further response steps providing that prompt action was taken to correct the monitoring equipment.
 - (2) The Permittee has determined that the compliance monitoring parameters established in the permit conditions are technically inappropriate, has previously submitted a request for an administrative amendment to the permit, and such request has not been denied. ~~or;~~
 - (3) An automatic measurement was taken when the process was not operating. ~~or~~
 - (4) The process has already returned or is returning to operating within "normal" parameters and no response steps are required.
- (d) Records shall be kept of all instances in which the compliance related information was not met and of all response steps taken. In the event of an emergency, the provisions of 326 IAC 2-7-16 (Emergency Provisions) requiring prompt corrective action to mitigate emissions shall prevail.
- (e) All monitoring required in Section D shall be performed at all times the equipment is operating. If monitoring is required by Section D and the equipment is not operating, then the Permittee may record the fact that the equipment is not operating or perform the required monitoring.
- (f) ~~If for reasons beyond its control, the Permittee fails to perform the monitoring and record keeping as required by Section D, then the reasons for this must be recorded.~~

- (4) At its discretion, IDEM may excuse **the Permittee's failure to perform the monitoring and record keeping as required by Section D, if the Permittee provides such failure providing adequate justification is documented and documents that** such failures do not exceed five percent (**5%**) of the operating time in any quarter.
- (2) Temporary, unscheduled unavailability of qualified staff shall be considered a valid reason for failure to perform the monitoring or record keeping requirements in Section D.

14. On page 31 of 50, C.19 (now page 26 of 45, C.18) (Actions Related to Noncompliance Demonstrated by a Stack Test) "corrective actions" has been changed to "response actions" to be consistent with the rest of the permit.

C.198 Actions Related to Noncompliance Demonstrated by a Stack Test [326 IAC 2-7-5]
[326 IAC 2-7-6]

- (a) When the results of a stack test performed in conformance with Section C - Performance Testing, of this permit exceed the level specified in any condition of this permit, the Permittee shall take appropriate **corrective response** actions. The Permittee shall submit a description of these **corrective response** actions to IDEM-OAMQ and HDEM within thirty (30) days of receipt of the test results. The Permittee shall take appropriate action to minimize excess emissions from the affected facility while the **corrective response** actions are being implemented.
- (b) A retest to demonstrate compliance shall be performed within one hundred twenty (120) days of receipt of the original test results. Should the Permittee demonstrate to IDEM-OAMQ and HDEM that retesting in one-hundred and twenty (120) days is not practicable, IDEM-OAMQ and HDEM may extend the retesting deadline.
- (c) IDEM-OAMQ reserves the authority to take any actions allowed under law in response to noncompliant stack tests.

The documents submitted pursuant to this condition do not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

15. On page 31 of 50, C.20 (now page 26 of 45, C.19) (Emission Statement) "estimated" was added to (a)(1) and (a)(2) because that is how 326 IAC 2-6 describes emissions.

C.2019 Emission Statement [326 IAC 2-7-5(3)(C)(iii)][326 IAC 2-7-5(7)][326 IAC 2-7-19(c)][326 IAC 2-6]

- (a) The Permittee shall submit an annual emission statement certified pursuant to the requirements of 326 IAC 2-6, that must be received by **April 15** of each year and must comply with the minimum requirements specified in 326 IAC 2-6-4. The annual emission statement shall meet the following requirements:
 - (1) Indicate **estimated** actual emissions of criteria pollutants from the source, in

compliance with 326 IAC 2-6 (Emission Reporting);

- (2) Indicate **estimated** actual emissions of other regulated pollutants (as defined by 326 IAC 2-7-1) from the source, for purposes of Part 70 fee assessment.

16. On page 32 of 50, C.21 (now page 27 of 45, C.20) (General Record Keeping Requirements) “monitoring” was removed so that the condition will seem more generalized to all record keeping, “reports” was added to clarify that the source must keep copies of those as well. (b) and (c) have been removed because they were unnecessary. If we wanted records of those things, we would specify it in D or elsewhere in the permit.

C.240 General Record Keeping Requirements [326 IAC 2-7-5(3)][326 IAC 2-7-6]

- (a) Records of all required ~~monitoring~~ data, **reports** and support information shall be retained for a period of at least five (5) years from the date of monitoring sample, measurement, report, or application. These records shall be kept at the source location for a minimum of three (3) years. The records may be stored elsewhere for the remaining two (2) years as long as they are available upon request. If the Commissioner or HDEM makes a request for records to the Permittee, the Permittee shall furnish the records to the Commissioner or HDEM within a reasonable time.

~~(b) Records of required monitoring information shall include, where applicable:~~

- ~~(1) The date, place, and time of sampling or measurements;~~
~~(2) The dates analyses were performed;~~
~~(3) The company or entity performing the analyses;~~
~~(4) The analytic techniques or methods used;~~
~~(5) The results of such analyses; and~~
~~(6) The operating conditions existing at the time of sampling or measurement.~~

~~(c) Support information shall include, where applicable:~~

- ~~(1) Copies of all reports required by this permit;~~
~~(2) All original strip chart recordings for continuous monitoring instrumentation;~~
~~(3) All calibration and maintenance records;~~
~~(4) Records of preventive maintenance.~~

~~(d)~~**(b)** **Unless otherwise specified in this permit,** All record keeping requirements not already legally required shall be implemented within ninety (90) days of permit issuance.

17. On page 33 of 50, C.22 (now page 27 of 45, C.21) (General Reporting Requirements) the Semi-Annual Compliance Monitoring Report is now the Quarterly Deviation and Compliance Monitoring Report. References to the emergency report has been removed, all the information is in B.13. In (d) we have clarified that the report does need to be certified by the responsible official, this change is also reflected in all the D sections and the reporting forms. EPA has also requested this change.

C.221 General Reporting Requirements [326 IAC 2-7-5(3)(C)] [326 IAC 2-1.1-11]

- (a) ~~To affirm that the source has met all the compliance monitoring requirements stated in this permit.~~ The source shall submit **a the attached Quarterly Deviation and Compliance Monitoring Report or its equivalent.** Any deviation from the permit requirements, and the date(s) of each deviation, **the cause of the deviation, and the response steps taken** must be reported. **This report shall be submitted within thirty (30) days of the end of the reporting period.** The Quarterly Deviation and Compliance Monitoring Report shall include the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).
- (b) The report required in (a) of this condition and reports required by conditions in Section D of this permit shall be submitted to:
- Indiana Department of Environmental Management
Compliance Data Section, Office of Air ~~Management~~ **Quality**
100 North Senate Avenue, P. O. Box 6015
Indianapolis, Indiana 46206-6015
- and
- Hammond Department of Environmental Management
5925 Calumet Avenue – Room 304
Hammond, Indiana 46320
- (c) Unless otherwise specified in this permit, any notice, report, or other submission required by this permit shall be considered timely if the date postmarked on the envelope or certified mail receipt, or affixed by the shipper on the private shipping receipt, is on or before the date it is due. If the document is submitted by any other means, it shall be considered timely if received by IDEM-OAMQ and HDEM on or before the date it is due.
- (d) Unless otherwise specified in this permit, any quarterly report required in Section D of this permit shall be submitted within thirty (30) days of the end of the reporting period. The report does not require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).
- ~~(e) All instances of deviations as described in Section B- Deviations from Permit Requirements Conditions must be clearly identified in such reports. The Emergency/Deviation Occurrence Report does not require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).~~
- ~~(f) Any corrective actions or response steps taken as a result of each deviation must be clearly identified in such reports.~~
- ~~(g)~~**(e)** The first report shall cover the period commencing on the date of issuance of this permit and ending on the last day of the reporting period. Reporting periods are based on calendar years.

Section D

1. On page 36 of 50 (now page 30 of 45), D.1.7 (Testing Requirements) the model should not specify test methods. All test methods have to be approved by Compliance Data Section when a protocol is submitted. Language has been added to clarify which condition the testing is needed to show compliance.

D.1.7 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11] [326 IAC 8-7-3(1)]

During the period between 30 and 36 months after issuance of this permit, the Permittee shall perform VOC testing utilizing ~~Methods 25 or 25A (40 CFR 60, Appendix A) for VOC, or other~~ methods as approved by the Commissioner. Testing shall also be performed at the inlet and outlet of the Incinerator 1 to demonstrate the control and destruction efficiencies necessary to achieve compliance with the RACT equivalency emission limit of 4.02 lbs of VOC/gallon of coating solids as applied. This test shall be repeated at least once every 5 years from the date of this valid compliance demonstration. Testing shall be conducted in accordance with Section C – Performance Testing.

2. On page 36 of 50 (now page 30 of 45), D.1.8 (Volatile Organic Compounds (VOC)) the last sentence has been removed, it is unnecessary since we have C.11 Compliance Requirements. In the last model we took out the no testing required condition, so it makes sense to get rid of this sentence for consistency.

D.1.8 Volatile Organic Compounds (VOCs) [326 IAC 8-1-2(b)] [326 IAC 8-7-3(3)]

Compliance with the VOC content and emission limitation contained in Condition D.1.4 shall be determined pursuant to 326 IAC 8-1-2(b) using formulation data supplied by the coating manufacturer. ~~IDEM-OAM and HDEM reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.~~

3. On page 37 of 50 (now page 31 of 45), D.1.9 (VOC Emissions) “most recent” has been taken out for clarity when using the day option. This condition should only be used with usage limits and not when there is an 8-2-9 limit.

D.1.9 VOC Emissions

Compliance with Condition D1.4 shall be demonstrated within 30 days of the end of each quarter based on the daily weighted average of all coatings applied for the ~~most recent~~ three (3) month reporting period.

4. On page 37 of 50 (now page 31 of 45), D.1.11 (Parametric Monitoring) in paragraph (b), language about failure to take response steps has been added. This will help clarify that not taking a response step will be considered a permit violation.

D.1.11 Parametric Monitoring

- (a) A continuous monitoring system shall be calibrated, maintained, and operated on the fume incinerator for measuring operating temperature. The output of this system shall be recorded, and that temperature shall be greater than or equal to the temperature used to demonstrate compliance during the most recent compliance stack test.
- (b) The Compliance Response Plan for this unit shall contain troubleshooting contingency

and response steps for when the reading is outside the above mentioned range for any one reading. **Failure to take response steps in accordance with Section C – Compliance Monitoring Plan – Failure to Take Response Steps, shall be considered a violation of this permit.**

5. On page 37 of 50 (now page 31 of 45), D.1.12 (Visible Emission Notations) in paragraph (e), language about failure to take response steps has been added. This will help clarify that not taking a response step will be considered a permit violation.

D.1.12 Visible Emissions Notations

- (e) The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed. **Failure to take response steps in accordance with Section C – Compliance Monitoring Plan – Failure to Take Response Steps, shall be considered a violation of this permit.**

6. On page 38 of 50 (now page 32 of 45), D.1.13 (Record Keeping Requirements) in paragraph (f), the word the was changed to this.

D.1.13 Record Keeping Requirements

- (f) All records shall be maintained in accordance with Section C – General Record Keeping Requirements, of ~~the~~ **this** permit.

7. On page 39 of 50 (now page 33 of 45), D.1.15 (Reporting Requirements) these reports should be certified by the responsible official. Part 70 requires all reports to be certified. EPA has also requested this change.

D.1.15 Reporting Requirements

A quarterly summary of the information to document compliance with Conditions D.1.4 and D.1.13 shall be submitted to the address(es) listed in Section C – General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does ~~not~~ require the certification by the “responsible official” as defined by 326 IAC 2-7-1(34).

8. On page 40 of 50 (now page 34 of 45), D.2.2 (Testing Requirements) the condition cited has been changed from D.3.1 to D.2.1.

D.2.2 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM or HDEM may require compliance testing at any specific time when necessary to determine if these facilities are in compliance. If testing is required by IDEM or HDEM, compliance with the limits specified in Condition D.32.1 shall be determined by a performance test conducted in accordance with Section C – Performance Testing.

9. On page 41 of 50 (now page 35 of 45), D.3.2 (Testing Requirements) the condition cited has been changed from D.4.1 to D.3.1.

D.3.2 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM or HDEM may require compliance testing at any specific time when necessary to determine if these facilities are in compliance. If testing is required by IDEM or HDEM, compliance with the limits specified in Condition ~~D.4.4~~ **D.3.1** shall be determined by a performance test conducted in accordance with Section C – Performance Testing.

10. On page 42 of 50 (now page 36 of 45), D.4.2 (Testing Requirements) the condition cited has been changed from D.2.1 to D.4.1.

D.4.2 Testing Requirements [326 IAC 2-7-6(1),(6)] [326 IAC 2-1.1-11]

The Permittee is not required to test these facilities by this permit. However, IDEM or HDEM may require compliance testing at any specific time when necessary to determine if these facilities are in compliance. If testing is required by IDEM or HDEM, compliance with the (PM) limit specified in Condition ~~D.24.1~~ shall be determined by a performance test conducted in accordance with Section C – Performance Testing.

11. On page 43 of 50 (now page 37 of 45), D.5.1 and D.5.2 (Volatile Organic Compounds (VOC)) for insignificant activities we don't always get enough details to know which rule applies or exactly how many units there are at the source. In order to clarify which ones are subject to which rule the following changes have been made.

D.5.1 Volatile Organic Compounds (VOC)

Pursuant to 326 IAC 8-3-2 (Cold Cleaner Operations) **for cold cleaning operations existing as of January 1, 1980**, the owner or operator shall:

- (a) Equip the cleaner with a cover;
- (b) Equip the cleaner with a facility for draining cleaned parts;
- (c) Close the degreaser cover whenever parts are not being handled in the cleaner;
- (d) Drain cleaned parts for at least fifteen (15) seconds or until dripping ceases;
- (e) Provide a permanent, conspicuous label summarizing the operation requirements;
- (f) Store waste solvent only in covered containers and not dispose of waste solvent or transfer it to another party, in such a manner that greater than twenty percent (20%) of the waste solvent (by weight) can evaporate into the atmosphere.

D.5.2 Volatile Organic Compounds (VOC)

Cold cleaner degreasers without remote solvent reservoirs:

- (a) Pursuant to 326 IAC 8-3-5(a) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaner degreaser facility **existing as of July 1, 1990**, shall ensure that the following control equipment requirements are met:
 - (1) Equip the degreaser with a cover. The cover must be designed so that it can be

easily operated with one (1) hand if:

- (A) The solvent volatility is greater than two (2) kiloPascals (fifteen (15) millimeters of mercury or three-tenths (0.3) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F));
 - (B) The solvent is agitated; or
 - (C) The solvent is heated.
- (2) Equip the degreaser with a facility for draining cleaned articles. If the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), then the drainage facility must be internal such that articles are enclosed under the cover while draining. The drainage facility may be external for applications where an internal type cannot fit into the cleaning system.
- (3) Provide a permanent, conspicuous label which lists the operating requirements outlined in subsection (b).
- (4) The solvent spray, if used, must be a solid, fluid stream and shall be applied at a pressure which does not cause excessive splashing.
- (5) Equip the degreaser with one (1) of the following control devices if the solvent volatility is greater than four and three-tenths (4.3) kiloPascals (thirty-two (32) millimeters of mercury or six-tenths (0.6) pounds per square inch) measured at thirty-eight degrees Celsius (38°C) (one hundred degrees Fahrenheit (100°F)), or if the solvent is heated to a temperature greater than forty-eight and nine-tenths degrees Celsius (48.9°C) (one hundred twenty degrees Fahrenheit (120°F)):
- (A) A freeboard that attains a freeboard ratio of seventy-five hundredths (0.75) or greater.
 - (B) A water cover when solvent is used is insoluble in, and heavier than, water.
 - (C) Other systems of demonstrated equivalent control such as a refrigerated chiller or carbon adsorption. Such systems shall be submitted to the U.S. EPA as a SIP revision.
- (b) Pursuant to 326 IAC 8-3-5(b) (Cold Cleaner Degreaser Operation and Control), the owner or operator of a cold cleaning facility **existing as of July 1, 1990**, shall ensure that the following operating requirements are met:
- (1) Close the cover whenever articles are not being handled in the degreaser.
 - (2) Drain cleaned articles for at least fifteen (15) seconds or until dripping ceases.
 - (3) Store waste solvent only in covered containers and prohibit the disposal or transfer of waste solvent in any manner in which greater than twenty percent (20%) of the waste solvent by weight could evaporate.

12. On page 45 of 50 (now page 39 of 45), D.5.4 (Reporting Requirements) these reports should be certified by the responsible official. Part 70 requires all reports to be certified. EPA has also requested this change.

D.5.4 Reporting Requirements

A quarterly summary of the information to document compliance with Condition D.5.3 shall be submitted to the address(es) listed in Section C - General Reporting Requirements, of this permit, using the reporting forms located at the end of this permit, or their equivalent, within thirty (30) days after the end of the quarter being reported. The report submitted by the Permittee does not require the certification by the "responsible official" as defined by 326 IAC 2-7-1(34).

FORMS

1. On page 47 of 50 (now page 41 of 45), Emergency/Deviation Occurrence Report Form is now called the Emergency Occurrence Report. All references to deviations have been removed. These forms should be sent to the Compliance Branch, not the Compliance Data Section. That report is certified by the responsible official, therefore will comply with the Part 70 requirement to have all reports certified.
2. The monthly and quarterly reports will now need to be certified by the responsible official, therefore the last line in each of these reports have been changed from ~~“A certification is not required for this report.”~~ to “Attach a signed certification to complete this report”.
3. On page 50 of 50 (now page 44 of 45), the Quarterly or Semi-Annual Compliance Monitoring Report, is now called the Quarterly Deviation and Compliance Monitoring Report. The form now requires the source to not only report that there were deviations, but to also include the probable cause and the response steps taken.
4. The necessary changes have been made to the forms to reflect the recent change from Office of Air Management to Office of Air Quality and OAM to OAQ.

Technical Support Document (TSD) for a Part 70 Operating Permit

Source Background and Description

Source Name:	Silgan Containers Manufacturing Corporation
Source Location:	2501 – 165th Street, Hammond, Indiana 46320
County:	Lake
SIC Code:	3479 & 3411 - Metal Coil Coating for Can Manufacturers, Coated Steel and Aluminum Coils
Operation Permit No.:	T089-6900-00202
Permit Reviewer:	Debra Malone, HDEM

The Hammond Department of Environmental Management (HDEM) has reviewed a Part 70 permit application from Silgan Containers Manufacturing Corporation relating to the operation of a Metal Coil Coating for Can Manufacturers Plant.

Permitted Emission Units and Pollution Control Equipment

The source consists of the following permitted emission units and pollution control devices:

- (1) One (1) Coil Coating Line, identified as Oven and Oxidizer 1, constructed in 1957, with a maximum line speed of 600 ft/min and maximum heat input rate of 44 MMBtu/hr and 20 MMBtu/hr, respectively (total combined capacity 64 MMBtu/hr), natural gas-fired only. The application method is roll coating. The VOC emissions from this line are controlled by one (1) fume incinerator which exhausts to stacks, identified as OX 1 and OX 3. This line also includes ten (10) mixing tanks, identified as MT1 – MT10, constructed in 1984, each with a maximum capacity of 290 gallons.
- (2) Three (3) Rapid Engineering Spaceheaters, identified as AMU 1, AMU 2, and AMU 3, constructed in 1996, each rated at 9.65 MMBtu/hr and natural gas-fired only.
- (3) Two (2) Dock Heaters No. 1 and No. 2, identified as Dock 1 and Dock 2, constructed in 1969, each rated at 0.75 MMBtu/hr and natural gas-fired only.

Unpermitted Emission Units and Pollution Control Equipment

The source also consists of the following unpermitted facilities/units which will be included within the Title V:

- (1) Seven (7) Indoor Vertical Storage Tanks, identified as Tanks 1 – 7, Tanks 1 – 5 each with a maximum capacity of 12,000 gallons, constructed in 1970, and Tanks 6 & 7 each with a maximum capacity of 10,000 gallons, constructed in 1995, venting to TV 1 – TV 7, respectively.

Insignificant Activities

The source also consists of the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (1) Space heaters, process heaters, or boilers using the following fuels.
 - (a) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour.
- (2) Equipment powered by internal combustion engines of capacity equal to or less than 500,000 Btu/hour, except where total capacity of equipment operated by one stationary source exceeds 2,000,000 Btu/hour.
- (3) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment.
- (4) Paved and unpaved roads and parking lots with public access.
- (5) Purging of gas lines and vessels that is related to routine maintenance and repair of buildings, structures, or vehicles at the source where air emissions from those activities would not be associated with any production process.
- (6) Emergency generators as follows:
Diesel generators not exceeding 1600 horsepower.
- (7) Grinding and machining operations combined with fabric filters, scrubbers, mist collectors, wet collectors and electrostatic precipitators with a design grain loading of less than or equal to 0.03 grains per actual cubic foot and a gas flow rate less than or equal to 4000 actual cubic feet per minute, including the following: deburring; buffing; polishing; abrasive blasting; pneumatic conveying; and woodworking operations.
- (8) A laboratory as defined in 326 IAC 2-7-1(21)(D).
- (9) Other categories with emissions below insignificant thresholds:
 - (a) One (1) Roll Grinder emitting less than one (1) lb/day of particulate.
 - (b) One (1) Emergency Diesel Generator emitting less than 1 lb/day of products of combustion.
 - (c) One (1) Gasoline Generator/Welder emitting less than 1 lb/day of products of combustion.
 - (d) One (1) Roll Lathe with Dust Collector emitting less than 1 lb/day of particulate.
 - (e) One (1) Radial Arm Saw with Cyclone and Bag Filter emitting less than 1 lb/day of particulate.
 - (f) Two (2) Closed Top Degreasers (20 and 55 gallon capacity) emitting less than 1 lb/day of volatile organic compounds.

Existing Approvals

The source has been operating under previous approvals including, but not limited to, the following:

- (1) OP# 01733 for the Coil Coating Line, issued on March 2, 2000; modified on May 14, 2000.
- (2) OP# 01758 for the Three (3) Rapid Engineering Spaceheaters, issued on March 2, 2000.

(3) OP# 01734 for the Dock Heater No. 1, issued on March 2, 2000.

(4) OP# 01735 for the Dock Heater No. 2, issued on March 2, 2000.

All conditions from previous approvals were incorporated into this Part 70 permit.

Enforcement Issue

- (a) IDEM is aware that equipment has been constructed and operated prior to receipt of the proper permit. The subject equipment is listed in this Technical Support Document under the condition entitled *Unpermitted Emission Units and Pollution Control Equipment*.
- (b) HDEM is reviewing this matter and will take appropriate action. This proposed permit is intended to satisfy the requirements of the construction permit rules.

There are no enforcement actions pending.

Recommendation

The staff recommends to the Commissioner that the Part 70 permit be approved. This recommendation is based on the following facts and conditions:

Unless otherwise stated, information used in this review was derived from the application and additional information submitted by the applicant. An administratively complete Part 70 permit application for the purposes of this review was received on October 15, 1996. Additional information was received on August 30, 1999, January 28, 2000, February 18, 2000, and March 6, 23 & 28, 2000.

A notice of completeness letter was mailed to the source on December 13, 1996.

Emission Calculations

See Appendix A of this document for detailed emissions calculations (six (6) pages).

and

The calculations for the Seven (7) Indoor Vertical, Fixed-Roof Storage Tanks submitted by the applicant have been verified and found to be accurate and correct. These calculations are provided as Appendix B & C of this document (each five (5) pages).

Potential Emissions

Pursuant to 326 IAC 2-1.1-1(16), Potential Emissions is defined as “the maximum capacity of a stationary source to emit any air pollutant under its physical and operational design. Any physical or operational limitation on the capacity of a source to emit an air pollutant, including air pollution control equipment and restrictions on hours of operation or type or amount of material combusted, stored, or processed shall be treated as part of its design if the limitation is enforceable by the U. S. EPA.”

This table reflects the PTE before controls. Control equipment is not considered federally enforceable until it has been required in a federally enforceable permit.

Pollutant	Potential Emissions (tons/year)
PM	<100
PM-10	<100
SO ₂	<100
VOC	>25
CO	<100
NO _x	>25

Note: For the purpose of determining Title V applicability for particulates, PM-10, not PM, is the regulated pollutant in consideration.

HAPs	Potential Emissions (tons/year)
Ethylbenzene	>10
Formaldehyde	<10
Methyl ethyl ketone (2-Butanone)	<10
Methyl isobutyl ketone (Hexone)	>10
Naphthalene	<10
Xylenes (isomers and mixtures)	>10
Glycol Ethers	>10
TOTAL	>25

- (a) The potential to emit (as defined in 326 IAC 2-1.1-1(16)) of Volatile Organic Compounds (VOCs) are equal to or greater than 25 tons per year. Therefore, the source is subject to the provisions of 326 IAC 2-7.
- (b) The potential to emit (as defined in 326 IAC 2-1.1-1(16)) of any single HAP is equal to or greater than ten (10) tons per year and the potential to emit (as defined in 326 IAC 2-7-1(29)) of a combination HAPs is greater than or equal to twenty-five (25) tons per year. Therefore, the source is subject to the provisions of 326 IAC 2-7.
- (c) **Fugitive Emissions**
 Since this type of operation is not one of the twenty-eight (28) listed source categories under 326 IAC 2-2 and since there are no applicable New Source Performance Standards that were in effect on August 7, 1980, the fugitive emissions are not counted toward determination of PSD and Emission Offset applicability.

Actual Emissions

The following table shows the actual emissions from the source. This information reflects 1998 emission data.

Pollutant	Actual Emissions (tons/year)
PM	0.9272
PM-10	0.9272
SO ₂	0.0615
VOC	130.185
CO	10.248
NO _x	12.2

Pollutant	Actual Emissions (tons/year)
Benzene (including from gasoline)	0.0023
Cumene	0.0721
Formaldehyde	0.11805
Isophorone	1.8119
Methanol	0.0644
Methyl isobutyl ketone (Hexone)	4.1244
Phenol	0.008175
Toluene	2.90025
Vinyl acetate	0.01275
Xylenes (isomers and mixtures)	35.9121
Ethylene glycol monbutyl ether	20.385

Potential to Emit After Issuance

The table below summarizes the potential to emit, reflecting all limits, of the significant emission units after controls. The control equipment is considered federally enforceable only after issuance of this Part 70 operating permit.

Process/facility	Potential to Emit (tons/year)						
	PM	PM-10	SO ₂	VOC	CO	NO _X	HAPs
Coil Coater	N/A	1.270	84.096	*See Below	N/A	N/A	N/A
Stacks serving incinerator	N/A	1.358	N/A	N/A	N/A	N/A	N/A
Dock Heaters No. 1 and No. 2 – Insignificant Activity	0.049	0.049	0.004	0.035	0.541	0.644	N/A
Three (3) Rapid Engineering Spaceheaters	0.945	0.945	0.075	0.684	10.442	12.432	N/A
Seven (7) Indoor Vertical, Fixed-Roof Storage Tanks	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Total Emissions	0.994	3.622	84.175	0.719	10.984	13.076	N/A

*The VOC emissions from the Coil Coating Line shall be limited to 2.6 pounds per gallon (excluding water). Use of a non-compliant coating requires that compliance be determined according to RACT equivalency emission standards, expressed as pounds of VOC per gallon of coating solids, allowed under the applicable emission limitation contained in 326 IAC 8-1-2 (Compliance Methods). The equivalency emission limit is 4.02 pounds of VOC per gallon of coating solids as applied.

County Attainment Status

The source is located in Lake County.

Pollutant	Status
PM-10	Moderate Nonattainment
SO ₂	Primary Nonattainment
NO ₂	Attainment/Unclassifiable
Ozone	Severe Nonattainment
CO	Attainment/Unclassifiable
Lead	Attainment

- (a) Volatile organic compounds (VOC) and oxides of nitrogen (NO_x) are precursors for the formation of ozone. Therefore, VOC and NO_x emissions are considered when evaluating the rule applicability relating to the ozone standards. Lake County has been designated as nonattainment for ozone. Therefore, VOC and NO_x emissions were reviewed pursuant to the requirements for Emission Offset, 326 IAC 2-3.

Part 70 Permit Conditions

This source is subject to the requirements of 326 IAC 2-7, pursuant to which the source has to meet the following:

- (a) Emission limitations and standards, including those operational requirements and limitations that assure compliance with all applicable requirements at the time of issuance of Part 70 permits.
- (b) Monitoring and related record keeping requirements which assume that all reasonable information is provided to evaluate continuous compliance with the applicable requirements.

Federal Rule Applicability

- (a) Indoor Vertical, Fixed-Roof Storage Tanks 1 - 5 are not subject to the requirements of the New Source Performance Standard 326 IAC 12, (40 CFR 60.110, Subpart K – Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After June 11, 1973, and Prior to May 19, 1978; (40 CFR 60.110a, Subpart Ka – Standards of Performance for Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After May 18, 1978, and Prior to July 23, 1984; or (40 CFR 60.110b, Subpart Kb – Standards of Performance for Volatile Organic Liquid Storage Vessels (including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984. since they were constructed in 1970 (prior to June 11, 1973).

- (b) Indoor Vertical, Fixed-Roof Storage Tanks 6 & 7 and Mixing Tanks (MT1 – MT10) are not subject to the requirements of the New Source Performance Standard 326 IAC 12, (40 CFR 60.110b, Subpart Kb – Standards of Performance for Volatile Organic Liquid Storage Vessels (including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984.

Indoor Vertical, Fixed-Roof Storage Tanks 6 & 7 constructed in 1995 do not meet the applicability level of 40 m³ (10,567 gallons) pursuant to 60.110b(a).

Mixing Tanks (MT1 – MT10) constructed in 1984 also do not meet the applicability level of 40 m³ (10,567 gallons) pursuant to 60.110b(a).

- (c) This facility is not subject to the requirements of the New Source Performance Standard, 326 IAC 12, (40 CFR 60.460, Subpart TT – Standards of Performance for Metal Coil Surface Coating) because the affected facility, the Coil Coating Line, by definition has not been constructed, modified, or reconstructed after January 5, 1981.
- (d) This facility is not subject to the requirements of the New Source Performance Standard 326 IAC 12, (40 CFR 60.490, Subpart WW – Standards of Performance for the Beverage Can Surface Coating Industry) because the affected facility, the Coil Coating Line is not one of the affected facilities to which Subpart WW applies. Also, by definition the Coil Coating Line has not been constructed, modified, or reconstructed after November 26, 1980.

- (e) This facility is not subject to the requirements of the National Emission Standards for Hazardous Air Pollutants (NESHAPs) (326 IAC 14, (40 CFR 63.460(a), Subpart T – National Emission Standards for Halogenated Solvent Cleaning) because the two (2) 50 Gallon Closed Top Degreasers do not use any halogenated HAP solvents.

State Rule Applicability - Entire Source

326 IAC 1-5-2 (Emergency Reduction Plans)

The source has submitted an Emergency Reduction Plan (ERP) on January 9, 2001. The ERP has been verified to fulfill the requirements of 326 IAC 1-5-2 (Emergency Reduction Plans).

326 IAC 1-6-3 (Preventive Maintenance Plan)

The source has submitted a Preventive Maintenance Plan (PMP) on April 7, 1997. This PMP has been verified to fulfill the requirements of 326 IAC 1-6-3 (Preventive Maintenance Plan).

326 IAC 2-6 (Emission Reporting)

This source is subject to 326 IAC 2-6 (Emission Reporting), because it has the potential to emit more than ten (10) tons per year of VOC and NOx in Lake County. Pursuant to this rule, the owner/operator of the source must annually submit an emission statement for the source. The annual statement must be received by April 15 of each year and contain the minimum requirement as specified in 326 IAC 2-6-4. The submittal should cover the period defined in 326 IAC 2-6-2(8)(Emission Statement Operating Year).

The source is in compliance with the required emission statement submittals.

326 IAC 5-1 (Opacity)

Pursuant to 326 IAC 5-1-2 (Opacity Limitations), except as provided in 326 IAC 5-1-3 (Temporary Alternative Opacity Limitations), opacity shall meet the following, unless otherwise stated in this permit:

- (a) Opacity shall not exceed an average of twenty percent (20%) in any one (1) six (6) minute averaging period as determined by 326 IAC 5-1-4.
- (b) Opacity shall not exceed sixty percent (60%) for more than a cumulative total of fifteen (15) minutes (sixty (60) readings as measured according to 40 CFR 60, Appendix A, Method 9 or fifteen (15) one (1) minute nonoverlapping integrated averages for a continuous opacity monitor) in a six (6) hour period.

No violations of the opacity standards have been observed at this source.

State Rule Applicability - Individual Facilities

326 IAC 6-1-10.1 (Lake County PM10 emission requirements)

Pursuant to 326 IAC 6-1-10.1(Lake County PM10 emission requirements), the PM10 emissions from the Coil Coater shall be limited to 0.007 lbs/MMBtu and 0.290 lbs/hr as specifically listed in 326 IAC 6-1-10.1(d).

Pursuant to 326 IAC 6-1-10.1(Lake County PM10 emission requirements), the PM10 emissions from the Stacks serving the incinerator shall be limited to 0.007 lbs/MMBtu and 0.310 lbs/hr as specifically listed in 326 IAC 6-1-10.1(d).

326 IAC 7-4-1.1 (Lake County sulfur dioxide emission limitations)

Pursuant to 326 IAC 7-4-1.1 (Lake County sulfur dioxide emission limitations), the SO₂ emissions from the Coil Coating Oven and Incinerator shall be limited to 0.3 lbs/MMBtu as specifically listed in 326 IAC 7-4-1.1(b)(1).

326 IAC 8-1-2 (Compliance methods)

Pursuant to 326 IAC 8-1-2(b) (Compliance methods), VOC emissions shall be limited to no greater than the equivalent emissions, expressed as pounds of VOC per gallon of coating solids, allowed under the applicable emission limitation contained in this article for any surface coating operation using the compliance methods contained in subsection (a) or section 5 of this rule. Equivalency shall be determined by the following equation:

$$E = L / (1 - L/D)$$

Where: L = Applicable emission limit from this article in pounds of VOC per gallon of coating.

D = Density of VOC in coating in pounds per gallon of VOC.

E = Equivalent emission limit in pounds of VOC per gallon of coating solids as applied.

A solvent density of seven and thirty-six hundredths (7.36) pounds of VOC per gallon of coating shall be used to determine equivalent pounds of VOC per gallon of solids for the applicable emission limit contained in this article.

326 IAC 8-2-4 (Coil coating operations)

Pursuant to 326 IAC 8-2-4(b) (Coil coating operations), the VOC emissions from the Coil Coating Line shall be limited to 2.6 pounds per gallon (excluding water) as specifically listed in 326 IAC 8-2-4(b).

Use of a non-compliant coating requires that compliance be determined according to RACT equivalency emission standards, expressed as pounds of VOC per gallon of coating solids, allowed under the applicable emission limitation contained in 326 IAC 8-1-2 (Compliance Methods). The equivalency emission limit is 4.02 pounds of VOC per gallon of coating solids as applied.

326 IAC 8-3 (Organic Solvent Degreasing Operations)

Pursuant to 326 IAC 8-3-1(a) (Applicability), existing facilities as of January 1, 1980, performing organic solvent degreasing operations located in Lake County and located at a source which has potential emissions of 100 tons or greater per year of VOC are subject to the requirements of 326 IAC 8-3 (Organic Solvent Degreasing Operations).

The two (2) Closed Top Degreasers (one (1) 20 gallon capacity citrus-based, remotely stored and one (1) 55 gallon capacity solvent-based, not remotely stored) are subject to the requirements of 326 IAC 8-3-2 (Cold cleaner operation).

These requirements are currently being met.

Pursuant to 326 IAC 8-3-1(b) (Applicability), facilities existing as of July 1, 1990 performing organic solvent degreasing operations in Lake County using cold cleaner degreasers without remote solvent reservoirs are subject to the requirements of 326 IAC 8-3-5 (Cold cleaner degreaser operation and control).

The one (1) Closed Top Degreaser (one (1) 55 gallon capacity solvent-based (XA solvent), not remotely stored) is subject to the requirements of 326 IAC 8-3-5 (Cold cleaner degreaser operation and control).

These requirements are currently being met.

326 IAC 8-7 (Specific VOC Reduction Requirements for Lake, Porter, Clark, and Floyd Counties)

Pursuant to 326 IAC 8-7-2 (Applicability), coating facilities which emit or have the potential to emit a total equal to or greater than ten (10) tons per year of VOCs in Lake County shall be subject to the requirements of 326 IAC 8-7 (Specific VOC Reduction Requirements for Lake, Porter, Clark, and Floyd Counties).

Pursuant to 326 IAC 8-7-3(3) (Emission limits), Silgan has achieved an alternative overall emission reduction with the application of reasonably available control technology (RACT) that has been determined as reasonably available by the U.S. EPA and IDEM. Pursuant to 326 IAC 8-7-3(1), Silgan has also installed an add-on control system that achieves an overall control efficiency of ninety-eight percent (98%) as an emissions reduction measure.

326 IAC 8-9 (Volatile Organic Liquid Storage Vessels)

Pursuant to 326 IAC 8-9-6 (Record keeping and reporting requirements) stationary vessels with a capacity of less than thirty-nine thousand (39,000) gallons are subject to the reporting and record keeping provisions of section 6(a) and 6(b) of this rule and are exempt from all other provisions of this rule. The seven (7) Indoor Vertical, Fixed-Roof Storage Tanks are subject to the requirements of 326 IAC 8-9-6(b) since they each have capacities less than thirty-nine thousand (39,000) gallons.

Copies of the applicable rules will be provided with the permit.

Local Rule Applicability

Hammond Air Quality Control Ordinance No. 3522 (as amended)

Emissions from the combustion of natural gas are governed by the Hammond Air Quality Control Ordinance No. 3522 (as amended) for the following pollutants: Particulate Matter (PM), Sulfur Dioxide (SO₂), Volatile Organic Compound (VOC), Carbon Monoxide (CO), and Nitrogen Oxide (NO_x).

Testing Requirements

The VOC emissions from the Coil Coating Line shall be limited to 2.6 pounds per gallon (excluding water). Use of a non-compliant coating requires that compliance be determined according to RACT equivalency emission standards, expressed as pounds of VOC per gallon of coating solids, allowed under the applicable emission limitation contained in 326 IAC 8-1-2 (Compliance Methods). Pursuant to 326 IAC 8-1-2(b) (Compliance methods), VOC emissions shall be limited to no greater than the equivalent emissions, expressed as pounds of VOC per gallon of coating solids, allowed under the applicable emission limitation contained in this article for any surface coating operation using the compliance methods contained in subsection (a) or section 5 of this rule. Equivalency shall be determined by the following equation:

$$E = L / (1 - L/D)$$

Where: L = Applicable emission limit from this article in pounds of VOC per gallon of coating.

D = Density of VOC in coating in pounds per gallon of VOC.

E = Equivalent emission limit in pounds of VOC per gallon of coating solids as applied.

A solvent density of seven and thirty-six hundredths (7.36) pounds of VOC per gallon of coating shall be used to determine equivalent pounds of VOC per gallon of solids for the applicable emission limit contained in this article.

The equivalency emission limit is 4.02 pounds of VOC per gallon of coating solids as applied.

The source shall perform a compliance stack test on the Coil Coating Line to demonstrate compliance with the applicable VOC emission limitation. A compliance stack test shall also be performed at the inlet and outlet of the Incinerator #1 to demonstrate the control efficiencies necessary to achieve compliance with the RACT equivalency emission limit of 4.02 lbs of VOC/gallon of coating solids as applied.

Compliance Requirements

Permits issued under 326 IAC 2-7 are required to ensure that sources can demonstrate compliance with applicable state and federal rules on a more or less continuous basis. All state and federal rules contain compliance provisions, however, these provisions do not always fulfill the requirement for a more or less continuous demonstration. When this occurs IDEM-OAQ, in conjunction with the source, must develop specific conditions to satisfy 326 IAC 2-7-5. As a result, compliance requirements are divided into two sections: Compliance Determination Requirements and Compliance Monitoring Requirements.

Compliance Determination Requirements in Section D of the permit are those conditions that are found more or less directly within state and federal rules and the violation of which serves as grounds for enforcement action. If these conditions are not sufficient to demonstrate continuous compliance, they will be supplemented with Compliance Monitoring Requirements, also Section D of the permit. Unlike Compliance Determination Requirements, failure to meet Compliance Monitoring conditions would serve as a trigger for corrective actions and not grounds for enforcement action. However, a violation in relation to a compliance monitoring condition will arise through a source's failure to take the appropriate corrective actions within a specific time period.

The Compliance Determination Requirements applicable to this source are as follows:

The Coil Coating Line has applicable compliance determination conditions as specified below:

1. The source shall perform a compliance stack test on the Coil Coating Line to demonstrate compliance with the applicable VOC emission limitation. A compliance stack test shall also be performed at the inlet and outlet of the Incinerator #1 to demonstrate the control and destruction efficiencies necessary to achieve compliance with the RACT equivalency emission limit of 4.02 lbs of VOC/gallon of coating solids as applied. Performance testing is required initially between 30 and 36 months after issuance of the permit and then at least once every 5 years from the date of this valid compliance demonstration. In addition to these requirements, IDEM may require compliance testing when necessary to determine if the facility is in compliance.

The source shall perform VOC testing utilizing Methods 25 or 25A (40 CFR 60, Appendix A) for VOC, or other methods as approved by the Commissioner.

This monitoring condition is necessary to ensure compliance with 326 IAC 8-2-4(b) (Coil coating operations) and 326 IAC 2-7 (Part 70).

2. Compliance with the VOC emission limitation stated above shall be determined pursuant to 326 IAC 8-1-2(b) using formulation data supplied by the coating manufacturer. IDEM-OAQ and HDEM reserves the authority to determine compliance using Method 24 in conjunction with the analytical procedures specified in 326 IAC 8-1-4.

This monitoring condition is necessary to ensure compliance with 326 IAC 8-1-2(b) (Compliance Methods) and 326 IAC 2-7 (Part 70).

3. Compliance with the VOC emission limitation stated above shall be demonstrated within 30 days of the end of each quarter based on the daily weighted average of all coatings applied for the most recent three (3) month reporting period.

This monitoring condition is necessary to ensure compliance with 326 IAC 2-7 (Part 70).

4. The fume incinerator used for VOC control shall operate at all times when the Coil Coating Line is in operation. When operating, the fume incinerator shall maintain a minimum operating temperature of 1,400°F or a temperature determined in the compliance test in order to maintain a minimum 98% destruction of the volatile organic compound (VOC) captured.

This monitoring condition is necessary to ensure compliance with 326 IAC 8-2-4(b) (Coil coating operations), 326 IAC 2-7-6 (Compliance requirements), and 326 IAC 2-7 (Part 70).

The Compliance Monitoring Requirements applicable to this source are as follows:

The Coil Coating Line has applicable compliance monitoring conditions as specified below:

1. The source shall ensure that a continuous monitoring system is calibrated, maintained, and operated on the fume incinerator for measuring operating temperature. The output of this system shall be recorded, and the temperature shall be greater than or equal to the temperature used to demonstrate compliance during the most recent compliance stack test.

The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when the reading is outside the above mentioned range for any one reading.

This monitoring condition is necessary to ensure compliance with 326 IAC 2-7 (Part 70).

2. Daily visible emission notations of the incinerator stack exhausts shall be performed during normal daylight operations when exhausting to the atmosphere. A trained employee shall record whether emissions are normal or abnormal.

For processes operated continuously, "normal" means those conditions prevailing, or expected to prevail, eighty percent (80%) of the time the process is in operation, not counting startup or shut down time.

In the case of batch or discontinuous operations, readings shall be taken during that part of the operation that would normally be expected to cause the greatest emissions.

A trained employee is an employee who has worked at the plant at least one (1) month and has been trained in the appearance and characteristics of normal visible emissions for that specific process.

The Compliance Response Plan for this unit shall contain troubleshooting contingency and response steps for when an abnormal emission is observed.

The source shall be required to record this information in a log. The log shall be submitted upon request by HDEM or IDEM.

This monitoring condition is necessary to ensure compliance with 326 IAC 6-1-10.1(d) (Lake County PM10 emission requirements) and 326 IAC 2-7 (Part 70).

3. That the Permittee be required to submit to the Department a formal request to use any new coatings not previously applied for prior to use. This request must be submitted at least seven (7) days in advance of use. The Permittee shall ensure compliance with 326 IAC 8-2-4 by performing those calculations listed in Condition D.1.7 and providing the Department with an MSDS.

This monitoring condition is necessary to ensure compliance with 326 IAC 8-2-4 (Coil coating operations) and 326 IAC 2-7 (Part 70).

4. The source shall be required to record and maintain the monthly fuel usage for the Coil Coating Line. These records shall be submitted upon request by either HDEM or IDEM.

This monitoring condition is necessary to ensure compliance with 326 7-4-1.1 (Lake County sulfur dioxide emission limitations) and 326 IAC 2-7 (Part 70).

Air Toxic Emissions

Indiana presently requests applicants to provide information on emissions of the 188 hazardous air pollutants (HAPs) set out in the Clean Air Act Amendments of 1990. These pollutants are either carcinogenic or otherwise considered toxic and are commonly used by industries. They are listed as air toxics on the Office of Air Quality (OAQ) Part 70 Application Form GSD-08.

- (a) This source will emit levels of air toxics greater than those that constitute major source applicability according to Section 112 of the 1990 Clean Air Act Amendments.
- (b) See attached calculations for detailed air toxic calculations. Form ES1 – ES5 (five (5) pages).

Conclusion

The operation of this Metal Coil Coating for Can Manufacturers Plant shall be subject to the conditions of the attached proposed **Part 70 Permit No. T089-6900-00202**.

MDR based on maximum usage rate of 20 gallons per day.

DBE 5050 and XA Solvent are the two solvents used for cleaning.

The 20 gallons per day is a worst case scenario since the facility reuses the solvent/coating waste the next time the coating in question is used.

PM10: 326 IAC 6-1-10.1(d) -

Stack serving incinerators (3 units) 0.007 lbs/MMBtu; 0.310 lbs/hr

Coil coater 0.007 lbs/MMBtu; 0.290 lbs/hr

VOC: 326 IAC 8-2-4(b) - 2.6 lbs/gal excluding water

SO2: 326 IAC 7-4-1.1(b)(1) - 0.3 lbs/MMBtu

*The VOC emissions from the Coil Coating Line shall be limited to 2.6 pounds per gallon (excluding water). Use of a non-compliant coating requires that compliance be determined according to RACT equivalency emission standards, expressed as pounds of VOC per gallon of coating solids, allowed under the applicable emission limitation contained in 326 IAC 8-1-2 (Compliance Methods). The equivalency emission limit is 4.02 pounds of VOC per gallon of coating solids as applied.

Total VOC Allowable doesn't include VOC allowable from Coil Coating Line

Coil Coating Line VOC Allowable: 326 IAC 8-2-4(b) - 2.6 lbs/gal excluding water;

RACT equivalency emission limit: 4.02 lbs VOC/gallon of coating solids as applied.

Hammond Department of Environmental Management
-Air Pollution Control Division-

Insignificant Activities

The source includes the following insignificant activities:

- 1) Space heaters, process heaters, or boilers using the following fuels.
 - A) Natural gas-fired combustion sources with heat input equal to or less than ten million (10,000,000) Btu per hour.
- 2) Equipment powered by internal combustion engines of capacity equal to or less than 500,000 Btu/hour, except where total capacity of equipment operated by one stationary source exceeds 2,000,000 Btu/hour.
- 3) The following equipment related to manufacturing activities not resulting in the emission of HAPs: brazing equipment, cutting torches, soldering equipment, welding equipment.
- 4) Paved and unpaved roads and parking lots with public access.
- 5) Purging of gas lines and vessels that is related to routine maintenance and repair of buildings, structures, or vehicles at the source where air emissions from those activities would not be associated with any production process.
- 6) Emergency generators as follows:
Diesel generators not exceeding 1600 horsepower.
- 7) Grinding and machining operations controlled with fabric filters, scrubbers, mist collectors, wet collectors and electrostatic precipitators with a design grain loading of less than or equal to 0.03 grains per actual cubic foot and a gas flow rate less than or equal to 4000 actual cubic feet per minute, including the following: deburring; buffing; polishing; abrasive blasting; pneumatic conveying; and woodworking operations.
- 8) A laboratory as defined in 326 IAC 2-7-1(20)(C).
- 9) Other activities or categories not previously identified.
Insignificant Thresholds: Activities with emissions equal to or less than thresholds require listing only:
Volatile Organic Compounds (VOC) = 3 lbs/hour or 15 lbs/day
Ten (10) Mixing Tanks, identified as MT 1 - MT 10, each with a maximum capacity of 290 gallons.
Potential VOC emissions for each tank = 0.0057 lbs/hr; 0.0247 TPY Actual VOC emissions for each tank = 0.0057 lbs/hr; 0.0229 TPY

The following list of insignificant activities satisfies the requirement of 326 IAC 2-7-4(e):

- 1) One (1) Roll Grinder with particulate emissions of < 1 lb/day; 326 IAC 2-1-1.
- 2) One (1) Emergency Diesel Generator with products of combustion of < 1 lb/day; 326 IAC 2-1-1.
- 3) One (1) Gasoline Generator/Welder with products of combustion of < 1 lb/day; 326 IAC 2-1-1.
- 4) One (1) Roll Lathe with Dust Collector with particulate emissions of < 1 lb/day; 326 IAC 2-1-1.
- 5) One Radial Arm Saw with Cyclone and Bag Filter with particulate emissions of < 1 lb/day; 326 IAC 2-1-1.
- 6) Two (2) Closed Top Degreasers (one (1) 20 gallon and one (1) 55 gallon capacity) with volatile organic compound emissions of < 1 lb/day; 326 IAC 2-1-1.
